November 19, 2014

Mr. Patrick O'Donnell
Clerk of the Nebraska Legislature
Room 2018, State Capitol
Lincoln, NE 68509-4604

Dear Mr. O'Donnell:

As required by R.S. Supp 2014, 77-2715.01(2), I am submitting to you at the direction of the Tax Rate Review Committee this letter and its attachments as the annual report of the Committee for 2014.

The attachments are reports reviewed by the Committee on July 23, 2014, and November 19, 2014. At each meeting, the Committee voted unanimously to recommend to the Governor there was no need to call the Legislature into special session to adjust tax rates.

Further, as required by law, this report incorporates by reference the most recent tax expenditure report prepared by the Department of Revenue, as set forth by R.S. Supp. 2014, 77-382. The most recent report may be accessed at the following web address: http://www.revenue.Ne.gov/research/tax_exp_reports.html.

If you have any questions, please contact me at 402-471-0059.

Respectfully submitted on behalf of the Committee.

Sincerely,

Michael Calvert
Legislative Fiscal Analyst

TAX RATE REVIEW COMMITTEE

July 23, 2014

Required July Meeting Pursuant to Section 77-2715.01

Appropriations Committee Chair	Senator Heath Mello
Executive Board Chair	Senator John Wightman
Speaker of the Legislature	Senator Greg Adams
Revenue Committee Chair	Senator Galen Hadley
Tax Commissioner	Kim Conroy

Prepared by the Legislative Fiscal Office

Statutory Required Meetings

Section 77-2715.01 relates to the Legislature setting the sales and income tax rates and creates the Tax Rate Review Committee and its duties and responsibilities

“(1)(a) Commencing in 1987 the Legislature shall set the rates for the income tax imposed by section 77-2715 and the rate of the sales tax imposed by subsection (1) of section 77-2703. For taxable years beginning or deemed to begin before January 1, 2013, the rate of the income tax set by the Legislature shall be considered the primary rate for establishing the tax rate schedules used to compute the tax.

(b) The Legislature shall set the rates of the sales tax and income tax so that the estimated funds available plus estimated receipts from the sales, use, income, and franchise taxes will be not less than three percent nor more than seven percent in excess of the appropriations and express obligations for the biennium for which the appropriations are made. The purpose of this subdivision is to insure that there shall be maintained in the state treasury an adequate General Fund balance, considering cash flow, to meet the appropriations and express obligations of the state.

(c) For purposes of this section, express obligation shall mean an obligation which has fiscal impact identifiable by a sum certain or by an established percentage or other determinative factor or factors.

2) The Speaker of the Legislature and the chairpersons of the Legislature's Executive Board, Revenue Committee, and Appropriations Committee shall constitute a committee to be known as the Tax Rate Review Committee. The Tax Rate Review Committee shall meet with the Tax Commissioner within ten days after July 15 and November 15 of each year and shall determine whether the rates for sales tax and income tax should be changed. In making such determination the committee shall recalculate the requirements pursuant to the formula set forth in subsection (1) of this section, taking into consideration the appropriations and express obligations for any session, all miscellaneous claims, deficiency bills, and all emergency appropriations. The committee shall prepare an annual report of its determinations under this section. The committee shall submit such report electronically to the Legislature and shall append the tax expenditure report required under section 77-382.

In the event it is determined by a majority vote of the committee that the rates must be changed as a result of a regular or special session or as a result of a change in the Internal Revenue Code of 1986 and amendments thereto, other provisions of the laws of the United States relating to federal income taxes, and the rules and regulations issued under such laws, the committee shall petition the Governor to call a special session of the Legislature to make whatever rate changes may be necessary.”

Annual Report

LB962 enacted in the 2012 legislative session included a requirement that the Tax Rate Review Committee prepare an **annual** report of its determinations, submit such report electronically to the Legislature, and append the tax expenditure report required under section 77-382 to such annual report. As the Tax Rate Review Committee meets twice each year, for purposes of this provision the annual report will be prepared after the required November meeting.

Summary

1. Actual receipts for FY2013-14 were \$16.9 million above the forecast used at Sine Die of the 2014 Session which was the February 2014 forecast of the Nebraska Economic Forecast Advisory Board (NEFAB) plus two bills enacted during the 2014 legislative session. Adjusted revenue growth for FY2013-14 based on actual receipts is 4.5% compared to the 4.3% growth calculated per the February 2014 forecast.
2. Even with the above forecast FY14 receipts, the projected General Fund financial status for the current biennium shows a slight decline. The projected ending balance went from \$2.1 million above the minimum reserve to \$4.6 million below the minimum reserve. This is due to the above forecast receipts going to the Cash Reserve Fund and \$10.9 million of accounting adjustments.
3. The Cash Reserve Fund is projected at an unobligated balance of \$707.8 million. This is \$14.7 million above the estimate at the end of the 2014 legislative session. This is the highest dollar amount for an unobligated Cash Reserve Fund ending balance although when considered as a percent of annual revenues, the CRF balance in FY2008-09 was slightly higher.
4. The current status is based on the existing revenue forecast for FY2014-15. The NEFAB will not meet to evaluate this existing FY14-15 revenue forecast until October. At that time they will also make their first forecasts for the two years of the following biennium, FY2015-16 and FY2016-17.
5. The projected financial status for the following biennium, FY2015-16 and FY2016-17, shows a variance from the minimum reserve of a negative \$176.8 million which is the accumulation of a negative gap between on-going revenues and on-going spending. In FY13 and FY14 there was a \$200 million positive structural gap, the result of three years of above average revenue growth (7.4% average) and below average spending growth (3% average).

This positive gap turns into a projected \$73.7 million negative structural gap in FY14-15, the result of multiple actions including income tax cuts in both 2012 and 2014, reallocation of .25% sales tax to roads projects, a \$25 million increase in transfers-out for the Property Tax Credit program, and spending growth exceeding revenue growth in the biennium (6.3% spending and 4.7% revenue).

Accounting Adjustments:

Most of the "accounting adjustments" are transfers out that are authorized in statute but not in specific amounts or occur on a deficit basis like the Convention Center support and Dept of Revenue tax enforcement transfer per tax amnesty legislation.

Transfer-Out Fund 21190 Convention Center Support	(3,687,055)
Transfer-Out Fund 21195 Sports Arena Support	(1,857,971)
Transfer-Out Fund 21540 & 21541 Dept of Revenue enforcement	(750,000)
Transfer-Out to Mutual Finance Assistance Fund, cash flow	(1,675,000)
Transfer-Out State Patrol drug purchases (diff between \$115,000 and unexpended)	(79,082)
Error in Object 814200 to be corrected in FY15	(4,627,349)
All other accounting adjustments	1,704,979
Total Accounting adjustment	<u>(10,971,478)</u>

Lapse of Unexpended FY2013-14 Funds

Per the enacted appropriations bills, all unexpended appropriations from the first year of a biennium (FY13-14) are reappropriated to the second year of the biennium (FY14-15) except in a few certain instances. As encumbrances have not been certified in these instances, there are no assumed lapsed appropriations at this time. In any event the amount would likely be relatively small.

FY2013-14 Actual General Fund Receipts

Table 1 compares the various forecasts with actual receipts for FY2013-14. Table 2 shows actual receipts and adjusted growth for FY2013-14 and the previous five years, Table 3 shows a chronology of the FY2013-14 forecasts and Table 4 provides historical revenues and adjusted growth rates.

FY2013-14 actual receipts were \$14.4 million above the Sine Die estimates (February 2014 NEFAB forecast) and \$96.7 million above the certified forecast from July 2013.

(1) Automatic transfers reflect the prior year variance from forecast. For example the \$285.3 million transfer in FY13-14 actually reflects FY12-13 "excess" receipts compared to the certified forecast. Prior to FY95-96 the transfers occurred in all cases. After FY95-96 transfers only occurred if receipts were above forecast.

(2) Legislative transfers are enacted by legislation and include transfers to the General Fund or other funds.

Projected Budget – FY16/FY17 Following Biennium

For the “following biennium” (FY2015-16 and FY2016-17), the budget numbers reflect the annualized impact of the current budget actions plus an estimate of future year increases in entitlement programs, salary and health insurance increases, and other funding requirements that are normally not optional. It is an estimate based on “current law”, i.e. an estimate of future obligations with no change to underlying law that creates the obligation.

Table 5 Projected Budget Increases-Following Biennium
(includes on-going impact of 2013 budget actions)

<i>Dollar Changes from FY15 Base Year</i>	Annual % Change			Projected Increases	
	FY16	FY17	2 Yr Avg	FY2015-16	FY2016-17

Construction	--	--	reaffirm only	3,184,556	(4,698,444)
All Other	--	--	--	111,445	272,570
Total General Fund Increases (Biennial Basis)	4.5%	4.3%	4.5%	184,599,087	370,329,217
Projected Appropriation per Financial Status				4,290,424,617	4,476,154,747

About 38% of the projected increase is in Medicaid with an average growth of 8.7% per year. This reflects projected growth of 4.5% per year for population, client eligibility and utilization and 3% per year for provider rates. Also included in this number are annualized impacts of the Affordable Care Act (ACA) as it phases in to full implementation.

Another 29% of the total projected budget increase in the next biennium is TEEOSA school aid as projected under the current statute. General Funds for TEEOSA school aid is projected to increase by 6.4% in FY16 and 4.4% in FY17.

The large decline in the Children's Health Insurance program is the result of an expanded federal match rate from the Affordable Care Act, 68% to 91%.for FFY2015 to FFY2019.

The reductions shown for Early Childhood programs and the Resources Development Fund relate to deleting one-time funding contained in the FY15 base budget.

AID TO LOCAL GOVERNMENTS

State Aid to Schools (TEEOSA): The estimates for FY16 and FY17 are based on the same methodology utilized for the November 15 estimates required under current law for the proposed biennial budget but with Fiscal Office assumptions and should be considered Fiscal Office estimates. They are based on the statutory changes made in LB407 as enacted in the 2013 session and LB725 enacted in the 2014 session. The estimates reflect a growth in overall school aid of 6.4% in FY16 and 4.4% in FY17.

Special Education: Increases for FY15-16 and FY16-17 reflect a 2.5% per year increase, equal to the basic allowable growth rate under the K-12 school spending limitation and TEEOSA calculations. Statute provides for a 10% cap on increases in Special Education reimbursement starting in FY14-15 as amended by LB974-2014. The previous cap was 5%.

Early Childhood Programs: 2014 session budget adjustments included an additional \$3,415,000 of general funds in FY 2014-15 as aid for the early childhood education grant program. The aid was provided to the State Department of Education on a one-time basis to provide grants for early childhood programs over a three year period, from FY2014-15 through FY2016-17. The projected budget removes this one-time funding from the base budget and provides no other inflationary increases.

Aid to Community Colleges: A 3.5% per year annual increase is included for the following biennium budget reflecting increased state aid to support operations budget increases. This increase amounts to about a \$3.3 million per year increase.

Community Based Juvenile Services aid: LB561 enacted in the 2013 session, expanded the Nebraska Juvenile Service Delivery Project statewide in a three step, phase-in process beginning July 1, 2013 with full implementation by July 1, 2014. Under the bill the previously existing County Juvenile Services Aid Program is renamed the Community-based Juvenile Services Aid Program, and funding was increased by \$1,522,425 in FY14 and \$3,522,425 in FY15 to bring the total amount of aid funding for this program to \$3,000,000 in FY14 and \$5,000,000 in FY15. During floor debate on the bill, it was further stated that it was intended that funding for this program increase to \$7.0 million in FY16 and then \$10 million in FY17.

Homestead Exemption: This program is projected to increase by 4.8% in FY16 and 3.2% in FY17. This includes a 3% per year annual increase reflecting some level of inflationary increases plus annualizing the impact of two bills enacted in the 2014 session which made changes to income level eligibilities.

Aid to ESU's: The amount of aid to ESU's is based on funding of a certain level of core services and technology infrastructure. Growth in aid is set at the same rate as the basic allowable growth rate under the K-12 school spending limitation (2.5% per year).

AID TO INDIVIDUALS

Medicaid: For the following biennium, the average growth is 8.7% per year. This reflects projected growth of 4.5% per year for population client eligibility and utilization and 3% per year for provider rates. Also included in this number are annualized impacts of the Affordable Care Act (ACA) as it phases in to full implementation.

Public Assistance and Child Welfare: A basic growth rate of 6.0% per year is utilized for the various Public Assistance programs for the following biennium. This reflects projected growth of 3% per year for population client eligibility and utilization and 3% per year for provider rates.

Children's Health Insurance (CHIP): For the following biennium, a 7.5% per year increase is used which is the same as Medicaid. However the large decline is then the result of an expanded federal match rate (23%) from the Affordable Care Act. For FFY2015 to FFY2019 the federal match rate for SCHIP increases from an estimated 68% to 91%.

Developmental Disability Aid: A 4% per year increase is included. This provides the equivalent of 2.5% per year for rate equity similar to the employee salary assumption and 1.5% for clients transitioning from K-12 programs. As this projected budget assumes no expanded programs, nothing is assumed for funding of the waiting list.

Behavioral Health Aid: This area includes substance abuse and mental health aid. The increases in the following biennium reflect a 3% increase to reflect some annual increase in provider rates. Savings related to insurance coverage for behavioral health under the Affordable Care Act (ACA) go from \$5 million in FY2014-15 to \$10 million in both FY16 and FY17. Originally a \$15 million savings was factored into FY2014-15 but \$10 million was shifted back from the ACA contingency in the 2014 session.

ACA Contingency: The FY14-15 budget included a \$10,000,000 contingency appropriation if budgeted savings in the behavioral health program did not occur as planned. The amount allocated to the ACA Contingency program stays at \$10,000,000 in FY16 and then declines to \$5,000,000 in FY17 and then zero in FY18.

AGENCY OPERATIONS / CONSTRUCTION

Employee Salary Increases: Although salary increases will be the result of bargaining, some level of increase is factored in more for illustration than planning purposes. A 2.5% per year increase is included which approximates inflation and the current biennium funding.

Employee Health Insurance: For planning purposes, a 10% per year increase in health insurance is included for the following biennium. Because rates have been flat for the past several years due to coverage and program changes and drawing down fund balances, this higher growth is utilized to anticipate a potential hike in rates.

Operations Inflation: Included in the projected status is a general 2% increase in agency non-personnel operating costs. Although not provided as an across the board increase, this amount historically covers increases in utility costs at state and higher education facilities as well as food and other inflationary cost increases at 24/7 state facilities such as veterans homes, BSDC, etc...

Inmate Per Diem Costs: While some costs at the Dept of Correctional Services such as staffing are "fixed" within a range of inmate population, some costs change directly with each inmate. This includes items such as food, clothing, and medical care. A 3% per year increase is included to reflect both inflationary costs and an increase in the number of inmates.

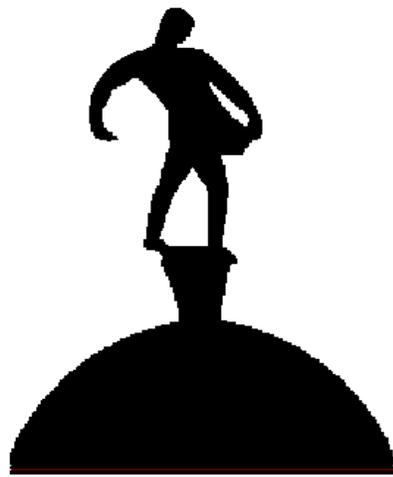

Defined Benefit Retirement Plans: The budget incorporated the changes enacted through LB553 (2013) and assume no change in state funding from the level established in FY14.

Juvenile Services Reform: LB561 passed in the 2013 session made many significant changes in the juvenile justice system. The bill expands the Nebraska Juvenile Service Delivery Project statewide in a three-phase process with the transfer of such funds to take place on July 1, 2013, January 1, 2014, and July 1, 2014. After July 1, 2013, the Office of Juvenile Services within the DHHS will only have responsibility for the Youth Rehabilitation Centers at Kearney and Geneva. The shift of funding includes about \$23 million that had previously been budgeted under child welfare aid. For purposes here, a 3% per year increase is included in operations for those amounts that had previously been included under child welfare aid.

Juvenile Court Jurisdiction: LB464 passed in the 2014 session changed court jurisdiction over juveniles and indictment procedures and changes provisions regarding the exclusive original jurisdiction of the Juvenile Court for juveniles age 16 and 17. The bill phases-in this jurisdiction change (age 16 on January 1, 2015 and age 17 on January 1, 2017) and associated costs for additional probation officers and other probation staff, treatment for juveniles, pre-adjudication out-of-home placements, and pre-adjudicated evaluations. General Fund costs for this bill go from \$5.4 million in FY14-15 to \$8.6 million in FY15-16 and \$16.2 million in FY16-17.

Capital Construction: General Fund dollars included in the projected budget for the following biennium for capital construction reflect reaffirmations only based on projects funding in the FY14/FY15 biennial budget. These are dollar amounts needed to complete funding of previously approved projects.

Summary

This report includes a current projected General Fund Financial Status for the upcoming FY2015-16 and FY2016-17 Biennial Budget. This biennium had been shown as the “out years” in previous financial status. For planning purposes, this report also incorporates a new estimated financial status for the “out years” bringing in the FY2017-18 and FY2018-19 biennium. Assumptions for construction of the status for the upcoming biennium and estimates for the following biennium are discussed individually later in this report

These estimates are based on (1) current law, (2) October Forecast Board projections for FY15, FY16 and FY17, (3) revenue projections for the following biennium using the “historical average” methodology, and (4) an initial pre-session assessment of General Fund appropriations under current law using both agency requests and historical trends.

Projected Shortfall

The projected financial status shows an ending balance \$50.1 million ***below*** the minimum reserve for the upcoming FY15-16 / FY16-17 biennial budget. This projected “shortfall” declines slightly to \$33 million in the following biennium, FY17-18 / FY18-19 biennium. The projected status shows a relatively even balance between on-going revenues and appropriations with a positive gap shrinking as “out year” revenue growth drops below average.

Revenue Growth

Revenue growth (adjusted for rate and base changes) is modest over the three years, very close to the 33 year average. Revenue estimates for FY2014-15, FY2015-16, and FY2016-17 are the October 2014 forecasts from the Nebraska Economic Forecast Advisory Board (NEFAB). Revenue growth implied by these current forecasts is 6.3% in FY14-15, 5.1% in FY15-16 and 4.8% in FY16-17.

For the “following biennium”, revenue growth is calculated at 3.8% per year using the historical average methodology. The target growth is the historical average of 5.0% but adjusted down to 4.75% to exclude growth that is now negated by indexing of the income tax brackets. These calculated amounts are at the low end of preliminary, unofficial estimates prepared by the Nebraska Dept. of Revenue (NDR) and Legislative Fiscal Office (LFO) using IHS Economics and Moody’s forecasting information.

Spending Growth

For purposes of this projected status, spending growth is not derived based on what results in a balanced budget but is our best estimate of the costs of maintaining existing programs and services. These estimates reflect a basic continuation budget, including only those increases related either to entitlement programs, legislative intent, or costs to implement previously enacted legislative actions and reflect existing statute and policies. This then provides a benchmark from which policy makers can examine the changes to statute and policy choices that are necessary to then actually balance the budget.

In many cases, the projected increases for the upcoming biennial budget (FY15-16 and FY16-17) reflect agency requests for the items shown while estimated increases for the following biennium (FY17-18 and FY18-19) are based on historical trends. No new or expanded programs are included. *In many cases, rationales for the FY16 and FY17 requests are incomplete as these requests are currently under analysis.*

Overall the projected budget results in a budget growth of 4.6% in FY2015-16 and 2.9% in FY2016-17, a 3.7% two year average. To some extent, this relatively low growth reflects a 2.1% average growth in TEEOSA school aid, the single largest item in the General Fund budget. Medicaid is the second largest item and has a two year average growth of 7.6% largely driven by a reduced federal match rate in FY15-16.

This projected budget includes no new funds related to prison population and reform at this time and in fact includes a base reduction to remove the \$4.2 million funding for housing inmates in county jails added last session. At that time this was considered one-time as longer term solutions were to be addressed as part of the prison population reform under LB 907. The Nebraska Justice Reinvestment Working Group was created in LB 907 to work with the Council of State Governments Justice Center to conduct a study on and provide recommendation to help address the prison overcrowding and reform. At this time the study is on-going.

Projected Increase to FY15 Base Year	FY2015-16	FY2016-17	Two Yr total	% of Total
Medicaid (other than FMAP)	50,834,485	89,776,328	140,610,813	28.2%
Federal Medicaid Match rate (op & aid)	35,048,141	40,891,678	75,939,819	15.2%
TEEOSA Aid to Schools (General Funds only)	25,719,269	38,434,187	64,153,456	12.9%
General Increase (University+Colleges)	19,953,636	39,997,975	59,951,611	12.0%

Use of county jail housing (Corrections)	(4,226,625)	(4,226,625)	(8,453,250)	-1.7%
All Other	6,202,733	6,990,784	13,193,517	2.6%
Total	187,326,006	311,152,611	498,478,617	100.0%
Annual Percent Change	4.6%	2.9%	3.7%	

Cash Reserve Fund

A bright spot in the financial status is the fact that the unobligated ending balance in the Cash Reserve Fund is projected at \$769 million. This projected General Fund financial status and projected shortfall does not assume any of use of these monies other than that which is in current law and has been subtracted out to achieve the unobligated balance. Note that of this unobligated balance, \$707.5 million is "cash in the bank" while the other \$61.5 million depends on whether the FY2014-15 forecast is met or exceeded.

The relatively high balance in the Cash Reserve Fund (CRF) raises the question; is this balance too high? Should the balance be reduced and if so in what manner and by how much? Last session the Appropriations Committee followed the concepts that (1) a significant balance should be retained in the Cash Reserve Fund in light of the cyclical nature of variances from forecast and the dollar level of those variances cumulative over several years (see appendix A), and (2) any use of the Cash Reserve Fund should be for one-time items to match the one-time nature of the financing source.

FY2014-15 Deficits

Requests for FY2014-15 supplemental General Funds (aka deficits) total \$50.1 million for FY2014-15. The largest is \$16.5 million for the IV-E disallowance in DHHS and \$11.8 million for inmate medical costs. A complete listing of deficits is included in Appendix B.

Budget Risks

While the projected shortfall shown in the financial status as presented here appears to be relatively small and able to be addressed without many problems there are quite a few issues that aren't addressed here. Most of these relate to policy decisions that do not fit the criteria for developing this budget scenario.

As noted under the "Spending Growth" section, nothing is included regarding the prison overcrowding or reform issue including prison construction.

This projected status does not include any funding for state claims. There could be substantial claims with respect to water litigation and correctional issues.

Other than the small increase in TEEOSA school aid under the existing statutory formula, this projected budget includes nothing for additional property tax relief.

The Cash Reserve Fund contains a large unobligated balance and is a inviting target as a funding source for new and expanded items. The concern is that the Cash Reserve Fund, similar to an individual savings account, is a one-time source of funds. If used to finance an on-going budget action (either revenue or spending items) the key question is how to finance that budget action after the Cash Reserve Fund monies are gone ?

Total	(2.7)	59.2	56.4

Cash Reserve Fund

The Cash Reserve Fund (CRF) is not included as part of the "General Fund Reserve" (which is the ending General Fund balance for a biennium) and was created as a separate and distinct fund to cover cash flow needs within a month or several month period. The Cash Reserve Fund also serves as a "rainy day fund" in that revenues in excess of a "certified forecast" are transferred from the General Fund to Cash Reserve fund at the end of a fiscal year. As the certified forecast is basically the revenue estimate at Sine Die when the budget is finalized, these transfers sequester revenues in excess of that which is needed to balance the budget.

Budget actions related to the Cash Reserve Fund in the 2014 Session followed the concepts that (1) at this time a significant balance should be retained in the Cash Reserve Fund in light of the cyclical nature of variances from forecast and the dollar level of those variances cumulative over several years, and (2) any use of the Cash Reserve Fund should be for one-time items to match the one-time nature of the financing source.

The projected unobligated ending balance at the end of the current FY14/FY15 biennium based on current forecasts and 2014 session actions is \$707.5 million and would increase to \$769.0 million ***if*** FY2014-15 receipts reach the current forecast level.

Table 1 - Cash Reserve Fund Cash Flow

	Estimated FY2014-15	Estimated FY2015-16	Estimated FY2016-17	Estimated FY2017-18	Estimated FY2018-19
Beginning Balance	719,065,305	707,521,079	769,021,079	769,021,079	769,021,079
Excess of certified forecasts (line 3 in Status)	96,721,233	61,500,000	0	0	0
To Gen Fund per current law	(50,500,000)	0	0	0	0
To Nebr Capital Construction Fund (NCCF)	(57,515,459)	0	0	0	0
2015 Session Transfers	0	0	0	0	0
Ending Balance	707,521,079	769,021,079	769,021,079	769,021,079	769,021,079

The relatively high balance in the Cash Reserve Fund (CRF) raises the question; is this balance too high? Should the balance be reduced and if so in what manner and by how much? To try and address the issue of what the balance should be, we first look at what is the purpose of the Cash Reserve Fund. The major purpose of the fund is to provide protection against forecast errors. Monies are accumulated in the CRF when receipts exceed certified forecast levels and are then available to offset instances when receipts are below forecasts.

The level of "protection" or in other words the level of funds to retain in the Cash Reserve fund, can be derived by looking at historical variances derived by comparing forecasts at Sine Die of the legislative session when the budget was enacted and actual receipts which are known anywhere from 13 to 15 months later (see Appendix A). Over the 27 year period the average negative variance is -4.4% clustered in groups of 3 to 4 years. For simplicity, using a 4% negative variance clustered for four consecutive years would require a balance equal to about 16% of annual net receipts. Applied to the four years of the current "savings" cycle that began in FY11 yields a dollar balance of \$643 million based on projected revenue in FY13-14. Applied to the average forecast from FY16 to FY19 the target balance would be \$751 million. Table 2 on page 8 gives an historical summary of the fund balance.

Another factor to keep in mind is the need for supplemental funds during a budget down period. One recent illustration is the budget shortfall which occurred during the 2008 through -2011 legislative

sessions. During that time a total of \$986 million of one-time funds were utilized to balance the budget in addition to the various budget cuts that were made. The largest amount of these one-time funds, \$653.8 million, came from the federal government through several ARRA programs (FMAP, General and Education stabilization) followed by Cash Reserve Fund transfers (\$259 million) and extraordinary cash fund lapses (\$73.2 million). While this was a time of unprecedented revenue declines, it illustrates the cumulative impact of multiple year shortfalls.

Excess of Certified Forecasts

Shown on line 3 of the Financial Status, revenues in excess of "certified" forecasts are required by statute to be transferred from the General Fund to the Cash Reserve Fund. These would take place in July of the fiscal year following completion of that year. The \$96,721,233 transfer in FY15 reflects the amount the FY2013-14 actual receipts were above certified.

The \$61,500,000 million in FY2014-15 reflects the amount that the current revenue forecast (\$4,418,000,000) exceeds the July certified level (\$4,220,500,000). The certified forecast is the estimate at Sine Die 2014 when the FY2014-15 budget was enacted. Note that these amounts are included in the \$769 million estimated unobligated fund balance but are not yet "cash in the bank".

Transfers To / From General Fund

Unlike the automatic transfers that occur after the close of the fiscal year and are statutorily required, other transfers can take place as specifically enacted by the Legislature. The only current statutory transfer related to the General Fund occur in FY2014-15 and were authorized by LB130 enacted in the 2014 session. Following the concept that any use of the Cash Reserve Fund should be for one-time items to match the one-time nature of the financing source, the \$50.5 million transfer was to cover the costs of several one-time items

<u>Related Item</u>	<u>\$ Amount</u>	<u>Transfer</u>
DCS- temporary housing, county jails	4,950,229	
Natural Resources-Resources Development Fund	10,492,793

Job Training Cash Fund	10,000,000	
<i>Transfer to General Fund</i>	50,443,022	50,500,000

Transfers To/From Other Funds

In the 2013 session, LB 200 provided for a \$43,015,459 transfer from the Cash Reserve Fund to the Nebraska Capital Construction Fund (NCCF) sometime between July 1, 2013 and June 30, 2017 at the discretion of the Budget Administrator for construction of a new Central Nebraska Veterans Home to replace the existing facilities. Originally this transfer was shown in FY13-14, however has been shifted to FY14-15 since the actual transfer has not yet been made.

In the 2014 session, LB 130 provided for a \$14.5 million transfer from the Cash Reserve Fund to the NCCF. This covers the cost of the first three years of the State Capitol HVAC systems replacement project (\$11.7 million) and installation of four courtyard fountains in the State Capitol (\$2.5 million).

Table 2 Cash Reserve Fund – Historical Balances

General Fund Revenues

General Fund Revenue Forecasts

Current Biennium (FY15, FY16 and FY17)

Revenue estimates for FY2014-15, FY2015-16 and FY2016-17 are the October 2014 forecasts from the Nebraska Economic Forecast Advisory Board (NEFAB). Rate and base adjusted revenue growth implied by the forecasts for the FY16/FY17 biennium average 5.0% (5.1% in FY15-16 and 4.8% in FY16-17). When including the 6.3% growth in FY14-15 forecast, this provides an average growth of 5.4% over the three years that affect the financial status for the upcoming biennium. This reflects growth just slightly above the 5.1% historical 33 year average.

Following Biennium (FY18 and FY19)

The NEFAB does not make official forecasts for the following biennium or what's commonly referred to as the "out years". Although different methodologies could be utilized, the revenue estimates used for the following biennium (FY17-18 and FY18-19) are derived by the Legislative Fiscal Office (LFO) using a "capped" historical average methodology. This "smoothing" technique derives "out year" revenue estimates by

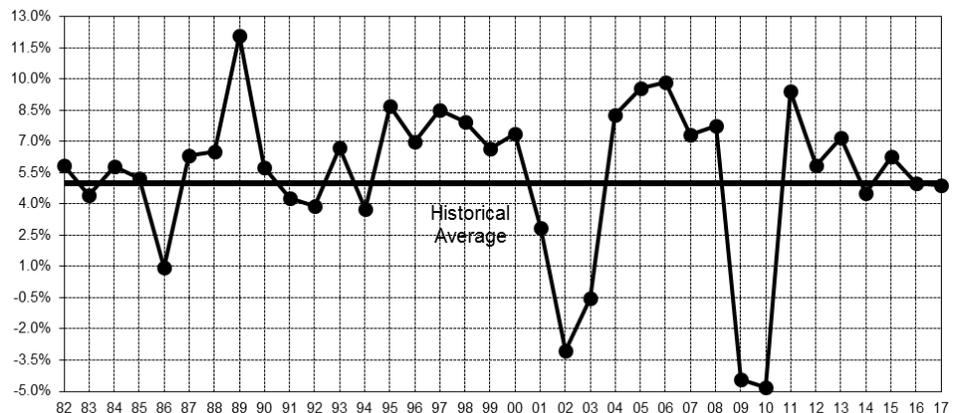

calculating the level of revenues that would yield a five year average growth (FY14 to FY19) roughly equal to the 33 year historical average. Inherent in this methodology is the concept that within any five-year period, below average revenue growth in some years will be offset by above average growth in others and is visually seen in the line graph of historical adjusted revenue growth.

Table 3 General Fund Revenue Forecasts

	NEFAB FY2014-15	NEFAB FY2015-16	NEFAB FY2016-17	LFO Prelim FY2017-18	LFO Prelim FY2018-19
Actual/Forecast					
Sales and Use Tax	1,580,000,000	1,640,000,000	1,710,000,000	1,770,000,000	1,830,000,000
Individual Income Tax	2,165,000,000	2,268,000,000	2,395,000,000	2,520,000,000	2,640,000,000
Corporate Income Tax	325,000,000	320,000,000	325,000,000	315,000,000	310,000,000
Miscellaneous receipts	212,000,000	190,000,000	192,000,000	192,000,000	175,000,000
Totals	4,282,000,000	4,418,000,000	4,622,000,000	4,797,000,000	4,955,000,000
Adjusted Growth					
Sales and Use Tax	6.8%	5.0%	3.1%	3.3%	3.2%
Individual Income Tax	6.4%	5.8%	6.4%	6.0%	5.3%
Corporate Income Tax	7.3%	-0.2%	2.5%	-2.5%	-1.3%
Miscellaneous receipts	-1.5%	5.3%	8.1%	-6.5%	-2.3%
Total	6.3%	5.0%	4.8%	3.8%	3.8%
Five Yr Average	6.6%	--	5.7%	--	4.8%

The "capped" provision of this methodology means that the derived growth needed in the out-years to achieve the historical average cannot be higher than the "above average" growth years nor lower than the "below average" growth years. Over the past 33 years, there were 11 years in

General Fund Revenue Growth
(Adjusted for Tax Rate and Base Changes)

which revenue growth was "below average" (1.1% average) and 22 years in which revenue growth was above average (7.3% average).

There has been one change in the implementation of this methodology. In the past, the target growth was the 33 year historical average which is 5.0%. Part of this revenue growth can be attributed to "bracket creep" in the income tax where the income tax brackets remained constant while inflation moved up incomes. Some of this bracket creep was subsequently offset by periodic legislatively enacted increases in the income tax brackets. However, because this was accomplished through legislation, the impact was adjusted out as part the base and rate adjustments and the 5% historical growth still includes the impacts of "bracket creep". LB 987 enacted in the 2014 session provides that the income brackets will be indexed for inflation starting with taxable years beginning on or after January 1, 2015 effectively eliminating the growth historically achieved through bracket creep. Therefore, the historical average which is used in the LFO methodology also must be adjusted to eliminate the growth attributed to bracket creep. The estimated revenue reduction of \$11-12 million is equal to approximately .5% of income tax and .25% total General Fund revenues. Therefore the target historical average growth used in this methodology is 4.75%, the historical 5% growth less .25% attributed to bracket creep.

Because the revenue growth in the NEFAB forecasts is slightly above average, the revenue growth needed to yield a 4.75% five year average is 3.8% in both FY17-18 and FY18-19.

Alternative methods are also available for purposes of deriving revenue estimates for the following biennium. In addition to the historical average methodology used in the financial status, both the Nebraska Dept of Revenue (NDR) and Legislative Fiscal Office (LFO) have calculated revenue estimates for these two "out years" using the same models and input from HIS

Table 4 Comparison of "Out Year" Forecasts

Based on Oct 2014 Revenue Forecasts	Current Status	Average IHS Economics	Average All Forecasts	High Est NDR-Moody'sr	Low Est LFO IHS
<u>Dollar Forecast (thousands)</u>					
FY2017-18 Prelim	4,797,000	4,848,246	4,933,808	5,115,346	4,743,375

Cumulative Total	0	157,538	329,899	700,535	(52,401)

Economics (previously Global Insight) and Moody's, the national forecasting services used as input into the tax forecast models. While these forecasts work well for the 1 to 3 year forecasts, when extended further they have a tendency to flatten out and follow the 3 year trend into the 4th and 5th year. In other words, they have difficulty picking up changes in the trend. The historical average methodology has been used since 1991 and the "smoothing" technique used for the most part relies on the trend changes.

As shown in Table 4, the preliminary estimates for the two "out years" arrived at using the historical average concept (as used in the Financial Status) tends to the low end however there are very large difference in the various numbers.

General Fund Transfers-Out

This area tabulates funds that are transferred from the General Fund to another fund within the state treasury. These items have the same effect as an appropriation but are not expended as such and thus are shown under the revenue category (see line 10 on the Financial Status on page 4).

Table 5 - General Fund Transfers Out

Excludes CRF Transfers	FY2014-15	FY2015-16	FY2016-17	FY2017-18	FY2018-19

<i>Total-General Fund Transfers-Out</i>	(188,350,000)	(153,050,000)	(153,050,000)	(152,300,000)	(152,300,000)

Property Tax Credit Cash Fund

Under this program transfers are made to the Property Tax Credit Cash Fund at the discretion of the Legislature. Based on the amount of funds available, monies are then allocated to counties by the ratio of the real property valuation in the county to the real property valuation in the state. Counties then allocate funds as credit to each tax payer again based on their proportionate value. Enacted in 2007, the amount available for credits was \$105 million in FY07-08, and \$115 million in FY08-09 through FY13-14. During the 2014 session, the FY14-15 amount was increased to \$140 million.

Note that the General Fund transfer amount is \$2 million less than the credit amount. The \$140 million credit level is financed by a combination of General Fund transfers (\$138 million in FY2014-15) and interest that will be earned on the fund balance from the time of transfer to the time of reimbursement payments to the counties, and credits calculated but unpaid relating to properties receiving homestead exemptions.

Water Resources Cash Fund

These transfers were originally enacted by LB 701 (2007) for the purpose of (1) aiding compliance efforts regarding the reduction of consumptive uses of water dealing with those natural resources districts which are deemed over or fully appropriated or are bound by an interstate compact or decree; and (2) for a statewide assessment of short- and long-term water management activities and funding needs that are statutorily required. The bill included transfers of \$2.7 million in both FY07-08 and FY08-09 and intent language for a \$2,700,000 General Fund transfer to occur annually from FY2009-10 through FY2018-19. LB229 enacted during the 2011 Session increased this transfer amount from \$2.7 million to \$3.3 million per year with no change in the FY2018-19 sunset.

Nebraska Cultural Preservation Endowment Fund

The Cultural Preservation Endowment Fund was originally created in 1998 with a transfer of \$5 million from the General Fund. LB 1165 (2008) provided for an additional \$5 million for the endowment fund through a \$1 million transfer from the Cash Reserve Fund and intent language that \$2 million shall be transferred from the General Fund to the Nebraska Cultural Preservation Endowment Fund in both FY2009-10 and FY2010-11. The enacted budget spread that \$4 million over a four year period, \$500,000 in FY10 and FY11 and \$1.5 million in FY12 and FY13. LB1063 (2010) changed the

statutory transfers from two \$1.5 million transfers to the Fund in both FY11-12 and FY12-13 to two transfers of \$500,000 and then extending the \$500,000 transfers for three more years, FY13-14, FY14-15, and FY15-16. LB378 (2011) deleted the FY12 and FY13 transfers, and then extended the \$500,000 annual transfers to FY17-18 and FY18-19. The current transfers are based on the provisions of LB193 (2013) which called for a \$500,000 increase in the FY13-14 transfer, a \$250,000 increase in the transfers for both FY16 and FY17 (from \$500,000 to \$750,000) and then eliminated the \$500,000 transfers for FY18 and FY19. There is no change in the overall level of transfers.

Water Sustainability Fund

This fund was created through LB906 passed in the 2014 session, included creation of the Water Sustainability Fund in the Department of Natural Resources. Monies for the fund come from General Fund transfers; \$21,000,000 in FY2014-15. Of this transfer, \$10,000,000 is considered one-time as it was financed by a like transfer from the Cash Reserve Fund to the General Fund. Intent language was include that \$11,000,000 General Funds be transferred to the Water Sustainability Fund in each fiscal year beginning in FY2015-16.

The fund would be used in accordance with guidelines established in LB 1098 which include programs, projects, or activities in the following categories: (a) Research, data, and modeling; (b) rehabilitation or restoration of water supply infrastructure, new water supply infrastructure, or water supply infrastructure maintenance or flood prevention for protection of critical infrastructure; (c) conjunctive management, storage, and integrated management of ground water and surface water; and (d) compliance with interstate compacts or agreements or other formal state contracts or agreements or federal law.

General Fund Transfers In

Cash funds are funds which contain earmarked revenue sources and monies in those funds can only be used for the purposes authorized by statute. In many instances (since the 2009 special session) an authorized use of monies in a cash fund is transfers to the General Fund at the discretion of the Legislature. For accounting purposes, these are shown as “Transfers in” and are included as revenues. The transfers shown below for FY2014-15 were enacted in the 2013 and 2014 sessions and already incorporated into the “Net Receipts” figures of the NEFAB forecasts

At the present time, current law does not provide for any transfers in FY2015-16 and FY2016-17 and as such the revenue forecasts do not include any transfers.

Table 6 General Fund Transfers In

	FY2014-15	FY2015-16	FY2016-17	FY2017-18	FY2018-19
Securities Act Cash Fund	21,000,000	0	0	0	0

Medicaid False Claims Cash Fund	6,800,000	0	0	0	0
<i>Total General Fund Transfers-In</i>	44,000,000	0	0	0	0

General Fund Appropriations

Table 7 reflects General Fund totals for the projected budget based on the increases noted in Table 8. These increases are a "best guess" estimate of budget changes for the upcoming biennial budget and the following biennium. A narrative description of the assumptions used in arriving at these numbers follows Table 8. **Note that in most cases, rationales for the FY15-16 and FY16-17 requests are not available as these requests are currently under analysis.**

These estimates reflect a basic continuation budget, including only those increases related either to entitlement programs, legislative intent, or costs to implement previously enacted legislative actions and reflect existing statute and policies. This then provides a benchmark from which policy makers can examine the changes to statute and policy choices that are necessary to then actually balance the budget..

In many cases, the projected increases for the upcoming biennial budget (FY15-16 and FY16-17) reflect agency requests for the items shown while estimated increases for the following biennium (FY17-18 and FY18-19) are based on historical trends.

Table 7 Projected General Fund Budget

	Current Year FY2014-15	Upcoming Biennial Budget FY2015-16 FY2016-17		Est for Following Biennium FY2017-18 FY2018-19

Overall the projected budget results in a budget growth of 4.6% in FY2015-16 and 2.9% in FY2016-17, a 3.7% two year average. To some extent, this relatively low growth reflects a 2.1% average growth in TEEOSA school aid, the single largest item in the General Fund budget.. Medicaid is the second largest item and has a two year average growth of 7.6% largely driven by a reduced federal match rate in FY15-16.

Aid to Local Governments

State Aid to Schools (TEEOSA)

The agency request was based on the 2014 Sine Die TEEOSA estimates for FY17 and FY18 which called for increased TEEOSA aid of \$61.2 million in FY15-16 and \$105.2 million in FY16-17. These numbers have been revised significantly in the Fall 2014 statutory required meeting of the Dept of Education, Legislative Fiscal Office, and DAS Budget Office. At that meeting, spending and valuation assumptions yielded a total TEEOSA number of \$961 million for FY2015-16 and \$976 million for FY2016-17. A significant part of the revised estimates came from higher estimated valuation (2014 actual vs estimate and first estimate for 2015) and lower spending estimate for school fiscal year 2015 (original estimate of 4% versus budget to budget growth of 3.2%) This projected budget includes those Fall 2014 estimates.

TEEOSA Summary	All Funds FY2014-15	All Funds FY2015-16	All Funds FY2016-17	All Funds FY2017-18	All Funds FY2018-19

October 2014 Joint Meeting	932,971,842	961,676,109	976,450,654	1,017,984,730	1,066,653,634

Special Education

The agency request included a 10% increase for both FY15-16 and FY16-17 which is the maximum authorized by statute. Statute provides for a 10% cap on increases in Special Education reimbursement starting in FY14-15 as amended by LB974-2014. The previous cap was 5%. The projection for FY16 and FY17 includes a 2.5% per year increase which is the basic allowable growth rate for those two school years for school districts.

Early Childhood Programs

Budget adjustments in the 2014 session included an additional \$3,415,000 of General Funds in FY 2014-15 as aid for the early childhood education grant program. The aid was provided to the State Department of Education on a one-time basis to provide grants for early childhood programs over a three year period, from FY2014-15 through FY2016-17. The projected budget removes this one-time funding from the base budget and provides no other inflationary increases.

Aid to ESU's

The amount of aid to ESU's is based on funding of a certain level of core services and technology infrastructure. Growth in aid is included at the same rate as the basic allowable growth rate under the K-12 school spending limitation (2.5% per year). The agency request included a 6% per year increase.

Homestead Exemption

This program is projected to increase by 7.0% in FY16 and 2.9% in FY17. This includes a roughly 4% per year annual increase for cost and eligibility increases plus annualizing the impact of two bills enacted in the 2014 session which made changes to income level eligibilities (LB986 \$847,000) and disabled veterans provisions (LB179 \$406,000).

Resources Development Fund

The projected budget includes funding for the Resources Development Fund at the agency request level. This includes a base reduction of \$10,492,793 in both years to remove one-time FY14-15 funding added in the 2014 session and an additional reduction of \$2,553,815 in FY16-17. LB906 capped future expenditures to the previously approved allocations for each project, prohibited reallocation among approved projects, and prohibited any new applications for funds in order to phase out the Resources Development with the creation of the Water Sustainability Fund. With the additional funding provided in FY14-15 and an appropriation of \$3,140,325 for F15-16, a reduced appropriation in FY16-17 will leave enough funds to satisfy remaining project commitments.

Community Based Juvenile Services aid

LB561 enacted in the 2013 session, expanded the Nebraska Juvenile Service Delivery Project statewide in a three step, phase-in process beginning July 1, 2013 with full implementation by July 1, 2014. Under the bill the previously existing County Juvenile Services Aid Program was renamed the Community-based Juvenile Services Aid Program, and funding was increased by \$1,522,425 in FY13-14 and \$3,522,425 in FY14-15 to bring the total amount of aid funding for this program to \$3,000,000 in FY14 and \$5,000,000 in FY15.

During floor debate on the bill, it was further stated that it was intended that funding for this program increase to \$7.0 million in FY16 and then \$10 million in FY17. Although the agency request included no additional funding for this program for the upcoming biennium, this projected budget includes an increase of \$2 million in FY16 and \$5 million in FY17 per legislative intent.

Aid to Community Colleges

A 3.5% per year annual increase is included for the following biennium budget reflecting increased state aid to support operations budget increases. This increase amounts to about a \$3.3 million per year increase.

Aid to Individuals/Other

Medicaid

For the upcoming biennium, the projected budget is based on the agency request plus a 2% increase in provider rates not included in the request.

Overall increase in General Funds is 10.1% in FY15-16 which includes \$21.4 million for eligibility and utilization increases, \$27.5 million for a reduction in the federal match rate (FMAP) from 53.27% to 51.16%, and \$8.9 million related to federal Dept. of Labor rules regarding domestic service providers and minimum wage. Though the agency request did not include any increase in provider rates, this projected budget includes a 2% per year increase.

Children's Health Insurance (SCHIP)

For the upcoming biennium, the projected budget is based on the agency request for eligibility and utilization increases and the decline in the basic federal match rate (FMAP). This projected budget includes a 2% per year increase in provider rates which was not included in the agency request.

The agency request included two other adjustments related to the FMAP; expiration of the current enhanced CHIP FMAP and a new expanded federal match rate (23%) from the Affordable Care Act (ACA) for FFY2015 to FFY2019. This projected budget assumes an extension of the existing enhanced CHIP FMAP and does not include additional General Funds for that issue. This projected budget does include reduced General Funds for the additional ACA related FMAP but at the Sine Die 2014 estimated level which is lower than the General Fund savings included in the request.

Public Assistance

For the upcoming biennium, the projected budget is mostly based on the agency request and results in an increase of 4.9% in FY15-16 and 3.8% in FY16-17. The request includes no increase for eligibility, utilization, or rate increases except for a \$3.5 million increase in FY15-16 for child care rates to reach the sixtieth percentile of current market rates.

Though the agency request did not include any general increase in provider rates, this projected budget includes a 2% increase for other providers and also includes an increase in child care rates for FY16-17.

Child Welfare

Like Public Assistance for the upcoming biennium, the projected budget is based on the agency request (excluding one issue) and results in an increase of 2.4% in FY15-16 and 1.9% in FY16-17. The request includes no increase for eligibility, utilization, or rate increases. Though the agency request did not include any general increase in provider rates, this projected budget includes a 2% provider rate increase

The agency request included \$14.6 million General Funds in FY15-16 related to repayment of disallowed Title IV-E Foster Care claims for federal fiscal year (FFY) FFY2010 – FFY2012. This was also included in the agency deficit request and is included in this projected budget as a FY14-15 deficit.

Developmental Disability Aid

Funding for developmental disability aid increases by 6.6% in FY15-16 and 3.9% in FY16-17. This includes \$1.4 million in FY16 and an additional \$1.2 million in FY17 for clients transitioning from K-12 programs and \$4.2 million in FY16 for a reduced FMAP. Although the DHHS request did not include any increased funding for rate equity, this projected budget includes a 2.5% per year rate equity increase the same as utilized for state employee salary increases. This projected budget also does not include any additional funds related to reducing the waiting list.

Behavioral Health Aid

This area includes substance abuse and mental health aid. The projected status includes \$3.2 million in FY16 (\$2.7 million in FY17) for a potential maintenance of effort penalty per the agency request. Items not included in the request but which are in this projected budget include a 2% per year increase in provider rates and a \$5 million base increase to restore the net \$5 million cut previously included based on estimated ACA related savings. Additional FY16 and FY17 ACA related savings that had previously been incorporated into "out year" budget estimates have been deleted.

State Agency Operations

Employee Salary Increases

At the present time there has been no collective bargaining agreement. Therefore this projected budget simply includes the same 2.5% annual increase that had been utilized last session. For purposes here this was applied to bargaining and non-bargaining employees.

Employee Health Insurance

At the present time insurance rates and cost increases for FY2015-16 and FY2016-17 are unknown. For state agencies this projected status includes a 10% per year increase as rates have been relatively flat for several years.

Operations Inflation

For FY16/FY17 biennium the only operating increases included are inflationary costs included at the DHHS 24 hour/7 days per week institutions and gasoline prices for the State Patrol. For the FY18/FY19 biennium, the projected status includes an allocation for operating cost increases equal to 2% of non-personnel operating costs including all state agencies, the University and State Colleges.

Supreme Court

LB464 passed in the 2014 session changed court jurisdiction over juveniles and indictment procedures and changes provisions regarding the exclusive original jurisdiction of the Juvenile Court for juveniles age 16 and 17. The bill phases-in this jurisdiction change (age 16 on January 1, 2015 and age 17 on January 1, 2017) and associated costs for additional probation officers and other probation staff, treatment for juveniles, pre-adjudication out-of-home placements, and pre-adjudicated evaluations. In addition to the base funding of \$5.4 million in FY14-15, the projected budget includes an additional \$2,706,111 in FY15-16 and \$11,471,034 in FY16-17 to fully fund the bill.

Dept of Health and Human Services

In terms of DHHS operations, the largest dollar increases included in the projected budget are shifts in funding from cash and federal sources to General Funds as included in the agency request. This includes \$3,200,000 due to depletion of the IV-E training fund and \$4,570,994 in mental health operations programs. For several prior bienniums, accumulated excess Federal and Cash funds were used to support operations at the Lincoln Regional Center and Hastings Regional Center. These excess funds were due in part to multiple year Federal Medicaid cost settlements. As a result of this accumulation, the fund mix for program 365 was redesigned to utilize these buildups and the excess funds have now been depleted.

Dept. of Correctional Services

This projected budget includes several large increases for the Dept. of Correctional Services especially for inmate medical costs largely driven by new Hepatitis C treatments. An item breakdown of the agency request and funding included in this projected budget is shown below.

This projected budget includes no new funds related to prison population and reform at this time and in fact includes a base reduction to remove the \$4.2 million funding for housing inmates in county jails added last session. At that time this was considered one-time as longer term solutions were to be addressed as part of the prison population reform under LB 907. The Nebraska Justice Reinvestment Working Group was created in LB 907 to work with the Council of State Governments Justice Center to conduct a study on and provide recommendation to help address the prison overcrowding and reform. At this time the study is on-going.

University and State College General Increases

In the past several biennium, a general overall budget increase has been provided to the university of Nebraska and State Colleges. In the projected budget, these general increases are included at a level to cover estimates of salary and health insurance increased costs. For salary, a 2.5% increase was included similar to state agencies. For health insurance, in the absence of actual numbers, these calculations use the agency request for the State Colleges (10.0% per year) and University of Nebraska (6% per year). The only other item included is a \$1.8 million base reduction in the University of Nebraska to take out one-time FY16 funding provided for pediatric cancer research.

Retirement (defined benefit plans)

At this time the increases included here are based on the agency request with annual increases of \$801,334 in FY16 and an additional \$370,933 in FY17 based on existing law. These are only an estimate with the final funding needs communicated in November 2014 following receipt of the annual actuarial valuation.

Capital Construction

General Fund dollars included in the projected budget for capital construction reflect reaffirmations only based on the FY14/FY15 biennial budget. These are dollar amounts needed to complete funding of previously approved projects. Nothing is included for new projects in FY16 or FY17.

Appendix C

Statutory Provisions - Tax Rate Review Committee

Statutory Required Meetings

Section 77-2715.01 relates to the Legislature setting the sales and income tax rates and creates the Tax Rate Review Committee and its duties and responsibilities

“(1)(a) Commencing in 1987 the Legislature shall set the rates for the income tax imposed by section 77-2715 and the rate of the sales tax imposed by subsection (1) of section 77-2703. For taxable years beginning or deemed to begin before January 1, 2013, the rate of the income tax set by the Legislature shall be considered the primary rate for establishing the tax rate schedules used to compute the tax.

(b) The Legislature shall set the rates of the sales tax and income tax so that the estimated funds available plus estimated receipts from the sales, use, income, and franchise taxes will be not less than three percent nor more than seven percent in excess of the appropriations and express obligations for the biennium for which the appropriations are made. The purpose of this subdivision is to insure that there shall be maintained in the state treasury an adequate General Fund balance, considering cash flow, to meet the appropriations and express obligations of the state.

(c) For purposes of this section, express obligation shall mean an obligation which has fiscal impact identifiable by a sum certain or by an established percentage or other determinative factor or factors.

2) The Speaker of the Legislature and the chairpersons of the Legislature's Executive Board, Revenue Committee, and Appropriations Committee shall constitute a committee to be known as the Tax Rate Review Committee. The Tax Rate Review Committee shall meet with the Tax Commissioner within ten days after July 15 and November 15 of each year and shall determine whether the rates for sales tax and income tax should be changed. In making such determination the committee shall recalculate the requirements pursuant to the formula set forth in subsection (1) of this section, taking into consideration the appropriations and express obligations for any session, all miscellaneous claims, deficiency bills, and all emergency appropriations. The committee shall prepare an annual report of its determinations under this section. The committee shall submit such report electronically to the Legislature and shall append the tax expenditure report required under section 77-382.

In the event it is determined by a majority vote of the committee that the rates must be changed as a result of a regular or special session or as a result of a change in the Internal Revenue Code of 1986 and amendments thereto, other provisions of the laws of the United States relating to federal income taxes, and the rules and regulations issued under such laws, the committee shall petition the Governor to call a special session of the Legislature to make whatever rate changes may be necessary.”

Annual Report

LB962 enacted in the 2012 legislative session included a new requirement that the Tax Rate Review Committee prepare an annual report of its determinations, submit such report electronically to the Legislature, and append the tax expenditure report required under section 77-382 to such annual report. As the Tax Rate Review Committee meets twice each year, for purposes of this provision the annual report will be prepared after the required November meeting
