LB 711

already have a marker which indicates that I have agreed to anatomical type of gifts and I'm wondering if this is something that is duplicative of already in practice?

SPEAKER NICHOL: No, I understand not. Ask Senator Marsh while I am getting my driver's license.

SENATOR MOREHEAD: Will Senator Marsh yield to a question? Senator Marsh, would you care to address the same question?

SENATOR MARSH: I would be glad to and I think this would be in addition to what we currently have on. Mine says, "Organ Donor." It simply would have a space on the back for telling in detail because my card which is the Uniform Donor Card is a very flimsy piece of paper and it would, and it is a notarized document, and it would simply have a permanent record that is easy to find because your driver's license is a firm piece of plastic and it would be much easier if it were permanently on the back of your card rather than also carrying this second thing. The alert on the front, the Organ Donor, tells them to keep looking in the billfold for something else and if it were all on one thing, it would be much easier than have them keep looking until they come across, yes, just what it is I have done.

SENATOR MOREHEAD: I thought maybe the information on that separate card was, in fact, on a computer some place so that this would have triggered a computer check or something but you indicate not. All right, thank you. Thank you, Speaker.

SENATOR LABEDZ: Senator Marsh.

SENATOR MARSH: Thank you, Madam President, I strongly support LB 711 and I move for its advancement.

SENATOR LABEDZ: Senator Nichol, would you like to close? There are no other lights.

SPEAKER NICHOL: Yes, Madam President, on the back of your driver's license now there is nothing like this. Now you can get a little sticker that Senator Morehead has on hers
