

undefined as to what is reasonable short of a series of court cases. What kind of delay that may cause I have no idea but, obviously, it could be a great deal. I have a great deal of sympathy for the problem that is attempted to be addressed and that is a problem we all have had contact with I am sure but it seems to me that we are creating a far greater problem than the problem that is attempting to be solved. I think the phrase "it may be the right problem but the wrong...the right issue but the wrong solution" would be an appropriate description of this bill. One place you could look at, if you wanted to look at ways to speed up construction, I expect a more appropriate place to look at would be the penalty that a contractor would be assessed for noncompletion. That might be a reasonable thing to look at, and those kinds of exceptions, however, are drawn in now. There is so many days to complete and bad weather doesn't count. But you have been talking about delay, and delay might be addressed that way as a more likely way than what is proposed here. I would hope that you would vote to indefinitely postpone the bill, not because we don't have sympathy with the problem, but, obviously, this approach is one that expands tremendously the obligations of governmental subdivision could have and it is an undefined obligation. It far extends what I think would be a reasonable solution to the issue.
