

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE  
Transcriber's Office

January 13, 1998

SENATOR WILL: Well, Senator Chambers, I think that the...the...I would agree with you that the terminology perhaps is not as refined as it could be. I think that the interpretation would be that simply once there is...the Speaker has designated a package that the intent of the rule would be that you simply take a vote on that package without amendment, motion or debate.

SENATOR CHAMBERS: No, I don't want an interpretation, Senator Will, and I think the Speaker should listen to this so that...cause he might want to vote on this. When the original language was there, we were referring specifically to the bill that is going to be processed without reading. That bill shall be read without amendment, motion or debate. We've stricken "bill" and now we're talking about the vote not being subject to amendment, not the motion to put the package together, not the motion on adopting the package but the vote. You cannot amend a vote. You cannot put a motion on a vote. You cannot debate a vote. The vote occurs when we begin to express our will either through answering the roll or punching that button. Now, if you're going to say that the vote cannot be amended it would mean that the person cannot change his or her vote, because that's an amendment to the vote. That's the only way you can amend it, by changing your vote. Now, is that what you mean by this language?

SENATOR WILL: Well, Senator Chambers, I guess if the...the fact is, and I think you make a good point in that a vote technically probably cannot be amended, if that's the case then the language that is included in the current rule is probably superfluous. I think that...whether it's there or not doesn't make any difference. The fact is that you simply take a vote to dispense with Final Reading and that's as far as the rule would go as far as what Senator Wesely is proposing. (inaudible).

SENATOR CHAMBERS: Thank you. Oh, excuse me. Thank you, Senator Will. Members, we need really to take more than three minutes on this and we should pay attention.

SPEAKER KRISTENSEN: One minute.
