

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office

April 7, 1998 LB 806, 1175

PRESIDENT ROBAK: Senator Elmer.

SENATOR ROBINSON: We could sing, too, you know, that...we'd really put them under.

SENATOR ELMER: Senator Robinson, we have a good colloquy going here, or dialogue. What my...mine would do would be mitigate what Senator Wickersham would say, that you can't freehold until the second override election. Mine would say if they do that, then we should remove the 60 student limit and allow anyone in a Class II or Class III district to freehold out after that...

SENATOR ROBINSON: Yeah.

SENATOR ELMER: ...that vote to override.

SENATOR ROBINSON: Yeah, that was my understanding. So, but I guess that I will see if Senator Bromm gets courageous and puts that amendment up. Thank you.

PRESIDENT ROBAK: Thank you, Senator Robinson. Senator Bohlke.

SENATOR BOHLKE: Madam President and members, this has been an interesting discussion and this is not an easy topic. I think there are a few things we have to keep in mind. One, it is not only 60 students, but it is with if you have 60 students and you're within 15 miles of another school and that, also, certainly, I have an amendment filed that says one way that would give schools a better idea of what they may have to be dealing with, if you would have to file a letter of intent, that if the override was successful, you would be pulling your land out. That would help schools, at least, be able to budget or know what the burden may be on those people in the towns as to what they may be facing in property tax. But I think what everyone has said, what Senator Wickersham, Senator Bromm, Senator Elmer and Senator Robinson is all true. It is not an easy issue. I do believe that people who have looked at 806 and recommended, a number of groups, not doing anything this session. The problem with dealing with this at this time is that I think in order to resolve it we would have to take a significant amount of time right now, probably the rest of the day, because it is complicated, and then I think all of us have
