that there is a full fee for the first one, and then they are grouped after that, and it does pertain to a very select group because, as Senator Jones said, there are limitations. This is for people who are not able to get the full amount of water that they need from one well, whereas maybe two miles down the road, someone is getting the eight hundred to a thousand gallons per minute that he was talking about, whereas they are drilling maybe fifty to sixty. So, because of that, they have to put in these additional wells. There are limitations. It is the irrigation wells only, cannot be used for stock ponds. It is on the same plot of land. We define common carrier and there is a limited time frame that they can construct new wells. So, I would urge your support for LB 92. Thank you.
