

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office

February 26, 1999 LB 446

That's how much security they had. If the people that they were going for hadn't been sound asleep, who knows what it could have led to. They had nothing to lose.

PRESIDENT MAURSTAD: One minute.

SENATOR TYSON: I'm going to.... Thank you, Mr. President. I'm going to ask Senator Wehrbein if he will respond to a single question.

PRESIDENT MAURSTAD: Senator Wehrbein.

SENATOR WEHRBEIN: Yes.

PRESIDENT MAURSTAD: Senator Wehrbein, in your amendment, and I'm not going to live and die on this amendment, what does NITC bring to the table in a positive sense?

SENATOR WEHRBEIN: Well, much as what I said in the...my opening, Senator Tyson, I believe it brings an even broader perspective from across the state from those that are technically nonusers: President of University of Nebraska, other people representing business interests, technology specialists that are on the Information Technology Commission. It brings an outsider perspective which it would do in any...many cases, not just looking over law enforcement and farm and in this case. But...

PRESIDENT MAURSTAD: Time. Senator Beutler.

SENATOR BEUTLER: I guess I'm developing a bit of a different perspective now that I'm on the Appropriations Committee. It's eye-opening in many ways. And one of the things that I've discovered and I'm sure I haven't reached a final assessment of it myself, but it's a problem I suppose you would naturally think would follow from the kinds of communication technology revolutions we've been going through in the last decade or two. The fact of the matter is, with each succeeding year, in terms of communication technologies, there's one change after another. And every change allows us to do something a little better. Every change, if used right, can lead to greater efficiencies, or at least to a broader, better service. But all of these
