

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office
FLOOR DEBATE

January 28, 2004 LB 449

SENATOR SCHIMEK: Thank you, Senator Stuthman and Senator Schrock. Senator Chambers, your light is next.

SENATOR CHAMBERS: Thank you. Madam President, members of the Legislature, whoever that was out in the hall didn't listen to what I had said, so I'd like to ask Senator Schrock a question or two.

SENATOR SCHIMEK: Senator Schrock.

SENATOR CHAMBERS: Senator Schrock, have you ever raised cattle?

SENATOR SCHROCK: Yes, we do it on our farm.

SENATOR CHAMBERS: Is the thickness of the hair of every cow the same thickness as a hair from every other cow?

SENATOR SCHROCK: Senator Chambers, I would presume that different cows have different thickness of hair.

SENATOR CHAMBERS: Would you presume the same to be true with reference to the thickness of the hair of various human beings?

SENATOR SCHROCK: I would assume that would be the case also.

SENATOR CHAMBERS: Which human being was the subject of the measurement that resulted in the person in the hall saying that the thickness of a hair is 60 microns, if you know?

SENATOR SCHROCK: I haven't the foggiest idea.

SENATOR CHAMBERS: Senator Schrock, do you think a hair from your head would be the same thickness as a hair from my head?

SENATOR SCHROCK: Senator Chambers, I assume it could be different, but I don't know that.

SENATOR CHAMBERS: Can either of us say that the thickness of a hair from your head is 60 microns, or that the thickness of a hair from my head is 60 microns?
