LB 289 pertains to low-speed vehicles. The bill allows low-speed vehicles to be operated on a highway on which the speed limit does not exceed 35 miles per hour. The bill requires that all low-speed vehicles sold in the state on or after January 1, 2012 be titled and registered. The registration fee is \$15. Low speed vehicles are also required to have a license plate and motor vehicle taxes and fees are to be paid on such vehicles.

The bill allows the Department of Roads (NDOR) to prohibit the operation of low-speed vehicles on any highway, if it determines it is necessary in the interest of public safety. The bill also repeals the Alternative Fuel Tax Act and provides for a \$75 fee to be paid upon registration of a vehicle powered by an alternative fuel.

Expenditures: The Department of Motor Vehicles (DMV) will incur an estimated one-time cost of \$29,250 of cash funds in FY 2011-12 for computer programming to modify the Vehicle Title Registration System to incorporate the titling and registering of low-speed vehicles and the collection of the alternative fuel fee. It is possible NDOR will have increased expenses for signs to prohibit low-speed vehicles on certain highways. No fiscal impact is estimated at this time.

Owners of motor vehicles powered by alternative fuels currently apply to the Department of Revenue for an annual alternative fuel user permit. The fee for a permit is \$75 fee which is deposited in the Highway Trust Fund. The bill provides for the collection of the \$75 fee at the time a motor vehicle is registered. The repeal of the Alternative Fuel Tax Act will minimally reduce the workload of the Department of Revenue. No fiscal impact is anticipated for the department.

Revenues: The number of low-speed vehicles is unknown. DMV estimates there may be about 100 low-speed vehicles titled in the initial year and an additional 100 titled in the second year. NDOR estimates there could be about 1,000 low-speed vehicles registered each year. Assuming there are 100 low-speed vehicles titled in 2011-12 and an additional 200 titled in 2012-13, the following chart shows the estimated revenue from title and registration fees. The revenue reverting to the Highway Trust Fund is remitted to NDOR (53 1/3%), cities (23 1/3%), and counties (23 1/3%).

The change in paying the alternative fuel fee during the registration process rather than to the Department of Revenue is revenue neutral for the Highway Trust Fund because the \$75 fee is unchanged by the bill.

The bill, as amended, requires low speed vehicles to have a single license plate. The Highway Trust Fund is the source of funding for license plates. It is assumed the cost to manufacture the plates will be covered by the license plate fee, so the bill will have no net fiscal impact for the Highway Trust Fund.

LB 289, as amended, imposes a motor vehicle base fee of \$10 and a motor vehicle base tax of \$50 for a low speed vehicle. The actual taxes and fees paid are determined by adjusting the base by a factor based on the age category of the vehicle. The maximum increase in revenue from an estimated 100 low speed vehicles in FY2011-12 and 200 additional vehicles in FY2012-13 is as follows for the entities shown:

COMMENTS					
NEBRASKA DEPARTMENT OF MOTOR VEHICLES: The Department of Motor Vehicles estimates approximately 100-200 registrations of low-speed vehicles. The Department of Roads estimates 1,000 such vehicle registrations. The Department of Motor Vehicles' revenue estimates may be low. No basis to dispute DMV cost estimate.					
DEPARTMENT OF ROADS: The Department of Roads estimates approximately 1,000 low-speed vehicles would be registered. The Department of Motor Vehicles estimates only 100 such low-speed vehicle registrations. Department of Roads' estimate of revenues may be high.					
DEPARTMENT OF REVENUE: The Department of Roads' fiscal note on LB 289 indicates the Highway Trust Fund would see a minor revenue increase of \$3,600 in FY 2011-12 and \$8,800 in FY 2012-13. No basis to dispute Department of Revenue's assumption that the bill will have no cost impact on the agency.
