would.

SENATOR CARPENTER: Then, let me further say that most people know that I have the ownership and a license of the corporation that sells these products. The only problem we have in this business is minors and we are plagued night and day and I don't think there is 1% of all the collective licensees who intentionally wants to sell a minor. Now, we have reduced the minimum age to 19 years which makes it more difficult. One of the problems we have is that people who buy beer particularly and specifically and then give it to minors or sell it to minors, and it is almost an impossibility to run that down. Now, I have been told this and I don't know how true it is. I've been told by a number of doctors in my community that young people basically are going from marijuana into beer and light wines because they are not then subject to any particular type of prosecution and they don't have the stigma in that in the area of the marijuana and it's a generally accepted practice in many a homes. I have no objection to this, but it's the youngster has access to beer, for example, as a family procedure and a family habit. I would like to do something because this thing of beer and wines has been more rapidly accepted. The sale of wine has gone up phenomenally and particularly among young people, and I just want to say here that we people who have a license, directly or otherwise are interested, we'd like to do something to stop this traffic and being honest about it, we don't know how to do it. And I would hope your bill could be amended. At least be as effective as we all hope it will be.

PRESIDENT: The chair recognizes Senator Luedtke, then Senator Nore, then Senator Murphy.

SENATOR LUEDTKE: Mr. President, members of the Legislature, I hate to be the one to oppose this most meritorious bill and noncontroversial bill this morning, but I am going to. This, if we are not going to take up any controversial issues, I want to speak against this bill and if you want to give me a chance to. I don't think it will take too long. It's up to you.

PRESIDENT: Well, if there's...it's the chairs understanding that if there is any objection at all to the bill that we are...

SENATOR LUEDTKE: I object.

PRESIDENT: We'll pass it over and I think that terminates it, then. Senator Nore, for what purpose do you rise?

SENATOR NORE: The same reason. This thing looks good on the surface but I would object.

PRESIDENT: All right. Thank you. We'll pass over the bill, then. Senator Whitney...excuse me. Senator Schmit, you have 235 which is up next. Senator Whitney tells me that he thinks that's controversial. Do you agree?

SENATOR SCHMIT: I agree Senator. Mr. President, I believe we should pass over the bill.

PRESIDENT: Stand by. Senator Duis, what about 336 and 336A. Pardon me. Senator Carpenter, what?

SENATOR CARPENTER: Senator Chambers has the bill 185 which is held up so that 235 could catch up with it. They are bills of a same nature. One I think requires full funding of 80% of ADC. I'd like to move with the concurrence of these two Senators to a day certain when they can both be heard and in the order they can agree upon. These are highly, may not be controversial, but we are talking about a lot of money, anyway. In one case it might be as high as twelve to fifteen million dollars. Now, if they have no objection, then I'll make a
