

March 26, 1973

listening, and I have studied, through in depth and so has every member on the health committee. We have received a lot of mail, a lot of personal contacts, we've had a lot of meetings, after hours, I'm sure that I have one of the greatest committees in this Unicameral. They are individually interested and spend considerably a lot of private time. They are not dodging the issue, as Senator Chambers proposed, they are not interested in political advancement, they are interested in good Government, in good sound subjects, and in doing what the people want. I think in visiting with the reference committee, the executive committee they're suggestions was that if our committee agreed on this subject after hearing the public hearing, that it was good to bring this resolution to this body in this manner, and I'm sure that they would state that if they were asked. I have been very serious in proposing that we do what is right in this body of Government and what is right for the state of
