

May 14, 1973

at school teachers. I remember that on the old lady school teachers, they came in here for example, and said that they wanted only a few dollars. Every year it is more dollars and more dollars and more dollars, and the ones who came here and I don't speak for all of the, I only speak for the ones I have seen. They are not very much in need. Now I'm sure that Senator Cavanaugh because he admits it, is a political issue with him, because he has most of them in his district and that is fine and I don't complain about that because we're all politicians and the Cavanaugh name has only one introduction to it, and that is politics, and I find no objection to that, but I, why should we call it many other things besides what it is. We're all here because of politics and we make the word just exactly what we want to make it. Now if you want to break this dam, fine, I'm the fellow that likes to spend money. I've got that reputation. I say it on television. I'm the greatest spender this State has ever seen in this Legislature, and I am proud of it. But I can't only spend for what I want, I have to go with you people, we compromise and we spend on what we all want. Now you still have got the issue before you. If you want to break it and read all the A bills, let's do it, and bear in mind when your doing it, all your trying to do by these democrats who are on the fleet, just like I am, I'm a democrat believe it or not. A great democrats, boy the Governor of this State can be proud he knew and he supported and I cross-support him. When he needs his strength and I am going to give it to him.

(End of Belt #5)
