

May 15, 1973

rather. Natural Resources and Rural Development and then after the word teaching it says Education as may be provided. There's nothing wrong with that, no significant change there at all. On the Engineering, it strikes the word Architecture, separates it, goes down below as a separate item and then adds the word Technology so that it's Engineering and Technology which is what we've got already and then the other new item is Rural Health and related subjects which there is certainly no objection to that and then Item 15 is Continuing Studies which they're doing already, Architecture which they're doing already but we had it be covered with the other section, it's just given a separate section now and the last item was Public Affairs and Community Service and then number 18 University College. This really adds nothing more than what they're doing right now except in the form of Rural Health and related subjects and Natural Resources and Rural Development. With that I would move the adoption of this amendment.

PRESIDENT: Any further discussion of the amendment? Senator Proud.

SENATOR PROUD: Senator Goodrich, this isn't the amendment is it? I couldn't catch all the discussion.

(End of Belt #6)

(Begin Belt #7)

To split the Engineering College?

SENATOR GOODRICH: We have, the amendment that you're talking about is the Mahoney amendment and that's been pulled.

SENATOR PROUD: Well, the amendment I'm talking about, there was a proposed amendment here to make two separate engineering schools is what it amounted to, but this is not that amendment?

SENATOR GOODRICH: No, that was the Mahoney amendment and that has been pulled. We're not even considering that any more.

PRESIDENT: Senator Nore.

SENATOR NORE: Mr. President, I'd like to ask Senator a question if he'd yield.

PRESIDENT: Senator Goodrich yield?

SENATOR GOODRICH: Yes.

SENATOR NORE: Now, this is at the, who is, who are advising on this bill? Whose idea is this?

SENATOR GOODRICH: This is a combination...

PRESIDENT: Wait a minute, Senator Goodrich, you've got us in a bind because Senator Nore speaks low and you speak loud so will you back up from your microphone a little bit because otherwise we're not going to get this exchange. Just stand back and talk naturally and we'll be fine. Okay, go ahead sir.

SENATOR GOODRICH: I just wouldn't want Senator Nore to miss a word.

PRESIDENT: You're coming in fine.

SENATOR GOODRICH: Okay, Varner, Nevell, Hannah who is the head man of engineering over all engineering for the University, have all been brought into the, and even the counsel for the University have all been brought into this and they are all in complete
