

May 23, 1973

cooperative organization are paid either by the member or the cooperative but in this particular State why they're paid twice and so I'm not going into a long dissertation on this but I think it's a matter of equity and that we should allow this amendment to stand.

SPEAKER: Senator Kremer.

SENATOR KREMER: Mr. Chairman and Members of the Legislature. I support the amendment. When this measure was put on the sales income tax bill, when it was passed several years ago, I, I caught it. I did not support it then and I do not support it now. As Senator Duis has just stated Nebraska is the only state that goes to this extent of taxing coops. Now coops are playing a real vital part in the farming, in the rural economy especially, and I think they're being subjected to an unfair tax. It's double taxation in my opinion

(End of Belt #6)
