

February 1, 1974

me that if the person is going to be taking a bill and is going to be pushing an issue that he should have his name on the bill and let it be his responsibility. I'm sure he wants to respond to that. I have case....

PRESIDENT: Well, Senator Snyder is asking unanimous consent to add Senator Mahoney's name to the bill, and we have an objection to that. That destroys that particular unanimous consent motion. Now, what is your pleasure Senator Snyder regarding the issue.

SENATOR SNYDER: I would move to suspend the rules. And as the rules state by machine vote have the name of Senator Mahoney added as a co-introducer to LB 762.

PRESIDENT: All right, that's the motion before the house at this time. And that would be to add Senator Mahoney's name to the bill. Senator Mahoney.

SENATOR MAHONEY: Mr. President. I graciously accept the part and parcel of that, Mr. President. You look a little disturbed. But I must answer Senator Snyder. I am not a commissioner candidate in the next race. I do see, however, you voted on the right side. You were with the elderly. You do have some brains.

PRESIDENT: Now, Senator Chambers do you want to debate on the issue here. For of which would add Senator Mahoney's name to the bill. That's really the only motion on debate.

SENATOR CHAMBERS: All I'm going to discuss, Mr. President. This bill has been tortured, contorted, and put through the type of agony which if it were a human being would have it in the cemetery now. I don't want to see that happen to this bill. And even though Senator Mahoney is willing to accept his name being placed on the bill, I do still object because I think it is not his intent to be a co-introducer of the bill. I don't know if Senator Clark wants any body else's name on the bill. But once it comes into this body it becomes the collect property of all of us. And I'm opposed to Senator Mahoney's name being put on as a co-introducer, and I ask you to defeat this motion.

PRESIDENT: Senator Stull is next to speak.

SENATOR STULL: Mr. President and members of the Legislature. I object to the remark that Senator Mahoney made. I voted against the Carpenter amendment, and I don't feel that I don't have brains. And I object to that, I think we should strike it from the record. I so move.

PRESIDENT: The motion before us now is to strike that remark from the record. Is there need to discuss that particular motion? The question is, shall that particular portion of the debate. Senator Waldron do you want to debate the motion by Senator Stull.

SENATOR WALDRON: Mr. President, I know the members here become very sensitive, and we all are, and I don't think there was any intent made by Senator Mahoney to infer that the one's that might have voted on the other side are without certain mental faculties. And but that's not his intent, but to point out to the Chair here, I don't think we have any procedures in our rules to strike the record. As a matter of fact, once the
