

worth. It may seem childish to argue over this issue but at least it is no more childish for one side of the issue than the other side. As far as compromising on a name, I usually start out where I hope to wind up. If I think that my cause is just. If I feel that other people are better horse traders they start out with some extreme and they expect to compromise and wind up in the middle somewhere. That is the difference in our position. I think that the name should remain as it is in this amendment and I would hope that you would not vote to add Senator Mahoney's amendment.

PRESIDENT: Senator Johnson.

SENATOR JOHNSON: Mr. President, members of the legislature I rise to oppose the Mahoney amendment. I think that the eastern the name eastern has been real well accepted and understood and the area is eastern and I think that it is best to leave it eastern so I oppose the amendment.

PRESIDENT: Very good, Senator Stahmer.

SENATOR STAHMER: Mr. President, I think that one thing is lost sit of in this debate. I rise to support Senator Mahoney and we say that the name eastern has been accepted. There isn't even an eastern college. There is an Omaha college, why did we name it Omaha? Then we are compromising and saying rather than give it either Omaha or eastern lets make it metropolitan. That is a compromise. There is no compromise in the other side. I think that rather than to call it eastern, we ought to call it Omaha because at least that school has been in existance for 50 years and eastern has never existed. This saying going to eastern as a compromise I just faile to see.....I don't understand it. It is not logical.

PRESIDENT: I want to make sure that I didn't hear an amendment to Senator Mahoney's amendment. Senator Stahmer.

SENATOR STAHMER: I'll amend Senator Mahoney's motion and make it the Omaha Technical Community College.

PRESIDENT: Substituting Omaha for metropolitan was it? OK, we are now debating the Stahmer amendment to the Mahoney amendment which changes the name to Omaha College.
