

March 8, 1974

So this would...and after all this is an educational program. This is our motto is the watchfulness of the citizen. This gives them a chance to watch, and that's important. And we have a problem of apathy in government. And this makes people less apathetic of what we are doing here.

PRESIDENT: Senator Chambers. Senator Nore will you turn your light out.

SENATOR CHAMBERS: Mr. President and members of the Legislature. I'll be very brief. I think that Mr. Fowler and the members of the ETV staff on various occasions have had an hours program covering the Legislature, so apparently their programing is schedule is flexible enough to allow these type of things to happen. It might be difficult and perhaps improper to specify that specific block of time more than a half an hour would have to be set aside. Many times what happens in the Legislature is repetitive. Sometimes it's boring. A lot of times it actually is highly technical in nature, and even the members of the body are not too interested, but these technical issues are discussed so they will be a matter of record, I imagine. But I would be opposed to setting a specific hour that had to be filled every evening. We all sometimes know that a day can occur when not enough happens to simply justify an hours programing. So rather than require an hour, it ought to left to the descretion -of somebody on occasion to reduce the half hour to a suitable amount of time to put what is of value, and when we come to judgements like this, of one person, or other people determining what is important of what somebody else has said, there is always going to be a difference of opinion. So if the amount of time is an hour, that would just mean there would be more issues to argue about, which were not covered on a very full day. So the thing I think is going to happen from this discussion that might be of value is that the people who edit these programs and determine the programing for it , ETV will be very watchful to see if there are very important issues that have not been adequately covered in a half hour, and with their flexible programing schedule they will make allowances and accomodate these things, but I don't think that merely because of some of what an individual ones of us say is not included that we should pass into statute certain regulatory measures dealing with ETV. And I'll say this based on ego. Naturally what I say is extremely important. I feel that I could say enough every evening to fill an half hour on television on any channel, but there are other people making decisions and judgements based on what the overall thrust of the program is to be and unfortunately, what I said in their judgement was not suitable.

PRESIDENT: Senator Cavanaugh. He skips, all right, Senator Warner.

SENATOR WARNER: Mr. President and members of the Legislature. Just briefly to speak on the same tone that Senator Cavanaugh did. Anumber of you who have spoken have referred to our activity as educational. And on this basis should be on educational TV. I do not disagree that what goes on here is not educational. But I would suggest that Senator Cavanaugh has suggested that if government operated stations, there is ana extremely fine line as to what may be educational and what may be propaganda. And as I have listened to the debate, both the other day and today, the continued references to what is contained in the program, and how much of a particular item is contained in a program seems to me then we are starting to reach that point of
