

January 24, 1979

LB 187

been suggested in previous years that the implementation of this change ought to be the same as when all equalization is taken care of.

SENATOR DWORAK: Which may be never.

SENATOR WARNER: But specifically, there is no reason why it couldn't be changed next year, as a practical matter.

SENATOR DWORAK: As much as I support this particular measure, I would hate to tie it onto the contingency of some equalization bill. You will offer that amendment on Select File then for a January 1, 1981 implementation date?

SENATOR WARNER: Yes.

SENATOR DWORAK: Thank you, Senator Warner.

PRESIDENT: The Chair recognizes Senator Carsten.

SENATOR CARSTEN: Mr. President and members of the Legislature, I rise in support of this bill. I know that it has been around for some time, and up until this year, we have had considerable opposition to the bill from the county level. I think it was well justified and I think the explanation that there was so much going on with reevaluations and turmoil on the local level before, and while there is still some, it has eased off, and by the time the change will be implemented, it will be fairly under control, we hope. I am glad that Senator Warner made the explanation of the rounding off of the cents. That was one point that was made at the hearing, and relative to the amendment, the committee, even though Senator Warner suggested we might want to consider that amendment, it was decided that perhaps Senator Warner had better do it on the floor with an explanation. I think he did very well with it and I would hope that you would accept Senator Warner's direction and recommendation and that we hold this and we will put it on Select File and put that amendment on it. By that time, I think that it will be fully understood and those associated with it will be ready to work with it and will do the job. Thank you, Mr. President.

PRESIDENT: The Chair recognizes Senator Kahle.

SENATOR KAHLE: Mr. President and members of the body, I support this concept and I believe that most counties are ready now to work with this situation in cents rather than mills. I would like to ask Senator Warner a question or two about some of the mechanics of it.
