

intent of inducing an abortion that act is an abortion by this definition. Senator DeCamp, contrary to what you said, an I.U.D. is a device and if it is administered with the intent of inducing an abortion, that is an abortion and there is no law on the books and I hope the lawyers will help me, not really. I hope you will help the Legislature to not look so foolish. I tried to include myself editorially with the body but I just can't bring myself because of my ego to do that. I am not foolish. I can read and I can understand words. You do not commit murder by placing an act with the intention of committing it. So anxious were they to try to lay what they did beside what Judge Urbom said that they created a situation where the intent without a resulting action or a result constitutes an abortion. It does not say in this definition that you do this act and the expulsion, the termination or whatever does occur, all you have to do is this act with the intention. So if man has impregnated a woman and he squeezes her with the intent of producing an abortion even though no abortion occurs, that is an abortion if you establish the intent. Now read, members of the eighty sixth Nebraska Legislature who are supposed to be the best, most intelligent people in Nebraska, at least the citizens have the right and opportunity to send such people here. Now what kind of laughing stock are you going to be and if I have misread the definition let one of the lawyers or the coinstructors show me. All that is required here is an intent. So, Senator Labeledz, Senator Venditte has broke camp. He has decamped and I hope it is not with.... Senator DeCamp, I would like somebody and this shows you why we need a division of the question, show me where a resulting abortion is necessary according to this definition. All that is needed is intent. They zeroed in on one part. You have to read the whole thing, here a little, there a little, line upon line. Senator Kremer, that is from the Old Testament but it stands us in good state here today and I say again on this one example, if I am wrong, show me. My motion is to divide the question.

SPEAKER MARVEL: Senator Chambers, you have been speaking to your motion to divide the question. Will you clarify what you mean by the division? Do you have a specific division that you want to propose?

SENATOR CHAMBERS: Yes, Mr. Chairman. I said I will take enumeration given by those who are offering the bill. They have numbered their various amendments and although certain amendments like number one may have several parts to it, I wouldn't further break it down more so than what they have done here. Those would at least beparts.
