

March 9, 1979

LB 359

PRESIDENT: Time is up.

SENATOR SCHMIT: ...and eventually it will be impossible to root it out until the taxpayer gets a belly full of it and removes some of us who spend the money for those projects.

PRESIDENT: The Chair recognizes Senator Keyes.

SENATOR KEYES: Mr. Speaker, I have one short question I am going to ask of Shirley Marsh and then of Senator Schmit. Senator Marsh.

SENATOR MARSH: Senator Keyes.

SENATOR KEYES: Senator Marsh, of these funds, and I presume it's the funds that go in to build dams and waterways and so forth, and on my own farm, the only thing I asked the ASC office was to lay out the lines. I build 95% of all the terraces myself. I even invented a terracer, Senator Marsh, that worked real good and it got along real fine until we got great big equipment and then I find out that I got a patent but they are using it down in Louisiana and Mississippi to clean out swamps, but can you tell me, Shirley, who decides and how they decide where this money is going to be, who is going to get the benefit of it? How do they decide that, can you tell me?

SENATOR MARSH: That decision is made in the department. This has to do, it is under Dale Williamson's arena, this has been in operation only since July, 1978. It has not had a year of operation yet, Senator Keyes. Mr. Williamson would be more than pleased to share with you individually, and rather than simply try to repeat something I heard this morning, I would ask you, rather, urge you to please call him or his department and have the very involved complete story.

SENATOR KEYES: Would you say that this mile and a half of dike that they are building along the Missouri River, the NRD that is there, would you say that that is, is that using this funds or what is that thing?

SENATOR MARSH: No, this is not using this funds. That is a separate department. It is a separate fund. It is a separate expenditure and they cannot be put together by simply doing away with one of the funds.

SENATOR KEYES: Can these funds be used to build habitat places and so forth for game?
