

supervision of any kind. Next year you become fifteen and you have got to get a learner's permit so that you can learn how to operate what you have been doing for a year? This is going to cause me trouble and I hope other people in the Legislature gets caused trouble with this too. Mr. Chairman, we are waiting for information if there is any.

SENATOR BEUTLER: I would have to let somebody else answer that question. I think what you are saying is correct although I understand that it doesn't sound perfectly logical but that is a problem it seems to me that we have to solve generally and not a problem to be addressed specifically in the moped bill. If you don't want them treated like... I think they should be treated like motorcycles and automobiles. If you think all three categories, moped, automobiles and motorcycles should be treated in a different manner altogether, I can understand that.

SENATOR KELLY: Mr. Chairman, on my time I would take the last two or three minutes I have got left which would be this, is that here we have a situation that the proposer of the amendments says that this isn't logical but that is the way the law is and that if I don't like it at some time I can change the law. What is a better time to change the law than right here when you are looking at it? Are we going to really advance a bill that we state into the public record is illogical? It appears that maybe we are going to but not with my vote. I would prefer that Senator Beutler put an amendment in there where both of them are fifteen where you can get a learner's permit or a school permit, something that would be logical. Thank you, Mr. Speaker.

SPEAKER MARVEL: Okay, now I have Senator Simon, then I have Senator Merz and then I have Senator Vickers. Senator Simon, do you wish to speak on the...? We are speaking to the committee amendments to LB 23.

SENATOR SIMON: I just have a question of Senator Merz if he will yield.

SPEAKER MARVEL: Senator Merz.

SENATOR MERZ: Yes, Senator Simon.

SENATOR SIMON: Does Massey-Ferguson make mopeds?
