LB 380A

I have amendments on 380 which we can debate later which will detail how the money will be spent. 380A expensive, yes, but Senator Haberman this will be one program. This will be one state operation which will make money. We have it in black and white. This program has worked on the pilot project level. Expanding this is going to cost a little bit of money but it is going to take some seed money but this program will pay for itself, it will provide jobs and I move for the advancement of the A bill.

PRESIDENT: All right, that was the closing on the motion to advance LB 380A. All those in favor vote aye, those opposed nay. Have you all voted? Voting on the advance of LB 380A. Have you all voted? Senator Reutzel, I hate to have you call for a Call of the House but it looks like we are going to have to...record the vote.

CLERK: 25 ayes, 2 nays, Mr. President.
