

SENATOR NICHOL: Mr. Chairman, members of the Legislature. I would like to ask a couple of questions of the Imperial Wizard. You don't mind me calling you that do you?

PRESIDENT: If he doesn't mind, I don't mind. Senator Haberman, will you respond?

SENATOR HABERMAN: Senator "Beans" Nichol, I will answer any questions that you wish.

SENATOR NICHOL: Okay, I'm just kidding. Senator Haberman, your Resolution doesn't address any future tests, does it, necessarily?

SENATOR HABERMAN: I'm afraid that it does not.

SENATOR NICHOL: Okay. Now, that is enough of the questioning. The other is simply a question to the rest of the members of the Legislature. Why should we not want to know the information in those Russian tractors that might be good for our information. In other words they may have some items on their tractors that we have not thought about and I am not above taking the information that would be advantageous perhaps to manufacturers in this country to use as perhaps bettering our own machinery. The other point I wish to make is that we do not go along with other countries confiscating our property when it is in their country. In fact we are in the process in Iran of just exactly this only having to do with people instead of machinery. I don't think we as a Legislature should take the stance that we will confiscate something simply because we are in a tiff with Russia at the moment. Even though we may like to.

PRESIDENT: Chair recognizes Senator Rumery.

SENATOR RUMERY: Thank you, Mr. President, colleagues, Mr. President, I would like to ask Senator Haberman a question or two.

PRESIDENT: Senator Haberman, will you respond?

SENATOR HABERMAN: Yes.

SENATOR RUMERY: Senator Haberman are you....I assume that you are aware of the court decision that was rendered a few years ago when the University of Nebraska took the Legislature to court indicating that we were attempting to administer the affairs of the University through our actions in the Legislature and the court found in their favor. I think that we are entering here into a questionable field. I think that this is
