

He is going to settle it right there in the assessor's office. You are either going to give in some yourself or he is going to change his mind. So I really do not see why we need this outstate. I think it is just a way to give the taxpayers a run around if he comes in and wants some action from the county board, just one more way that you can sidetrack him so that he can't get to the issue. I am going to have to vote against the whole works. Thank you.

SPEAKER MARVEL: Senator Lamb.

SEAAATOR LAMB: Mr. President and members of the Legislature, I rise to oppose the bill at this point. I was certainly willing to support it when it applied to Lancaster County because I can see how those commissioners have an impossible problem, but let's not extend it to the whole state. We don't want it out there. We don't need it out there and I suggest that either the amendment be removed or vote the bill down.

SPEAKER MARVEL: Senator DeCamp.

SENATOR DeCAMP: Do you all know what we are doing? We are lying to each other, aren't we. Do you want me to tell you what is all behind it? What is behind it is you might get some actual values. Now wouldn't that be something, Senator Lamb? Wouldn't that be something if, by golly, that ten thousand acre ranch out there...Joe Smith comes in with his house in town or his two hundred acre farm and he says, hey, look, you know, my land is valued at \$400 an acre but Joe Big Rancher, his land, identical land why she done be valued at \$25 an acre, and then he says it has been that way forever...been that way forever. Any possibility, any possibility, that we are going to actually start operating on the basis of actual values or actual knowledge out there, by golly, by golly we are going to jump up and stop no matter how we can do her, aren't we, because we can't afford to have the truth ever come out. We can't afford to have the big guys pay on the same basis of value as just us poor old average citizens with their houses, and Senator Murphy, the reason there haven't been all these protests or claims or complaints in the past is because the whole system has been so false that everybody thought they were cheating. What am I talking about? Well, maybe the houses were only fifty percent of value and so you thought, hey, I am getting away with murder, but everything else, the farm or whatever, was at twenty-five or twenty percent of value. With equalization and things forced up to actual value, the revolution is
