

colleagues come to the realization is that the time now is to find a compromise instead of doing this next year, and the year after is time well spent. I would hope that this time we are spending discussing various options, various other possibilities for making this kind of adjustment will be time that many of the members use, it doesn't look like they are, but many of the members would use to reflect on some possible way of resolving this issue. Not just for this year, but for many years to come. I would think that those who have pushed the hardest for 882 knowing of all of its flaws, knowing of all of its problems, knowing that it is not a long term solution, I mean those special interest groups that are so fearful of having the legislature write tax law that they would also reflect, that they would also look at an opportunity, a potential for making some change. To look at some areas where there might be some way to find that golden compromise that will last more than just for now. That more than that compromise (inaudible) in the stand on the ocean floor. With that, Mr. President, I cease my arguments. I urge the body to vote in favor of this amendment.

SPEAKER MARVEL: Clerk is going to read the amendment and then we are going to vote on it and then we are going to adjourn. The Clerk will read the amendment.
