

concerned for the rural youth who might be caught with one of these syringes and charged with having drug paraphernalia. So they don't want their youth caught with it and charged but, oh, the wicked city youth! What is the difference between young people? They are often what a society makes them and the things they want to do they will find a way to do it. We cannot outlaw everything that we don't like that people use. I am opposed to Senator Burrows amendment and I hope that you will see that we are beginning to make those exceptions that in the beginning we knew would have to occur and still the bill is not going to be constitutionally supportable. I think his amendment ought to be defeated and it would be good if the whole bill were but I don't think the will is here, I don't think the courage is here because the World Herald has dictated what should happen in this instance and that is why the bill is before us in the first place. We had a federal bureaucrat coming here telling the hicks in Nebraska what kind of law to enact. That is what they think Nebraskans are. They have got to think it. They would be too smart to take something like this to New York. They test it out here. Let's see how it flies out there in the middle of the tall corn where the only thing they used to have was a football team but now they are moving up in the world. Nebraska has two things to be proud of. They have got a gymnastics team, too. Intellectually that is a different story. Let's put them to the real test. Let's outlaw everything in the world and see if they go for it. Oh, and hook, line and sinker! Hook, line and sinker. The Attorney General almost pleaded and beseeched the Legislature not to do this foolish thing but what difference did it make? None. Primarily the concerns of the youth are involved. Senator Burrows, I don't see him, I won't ask the...oh, my time is up anyway.

SPEAKER MARVEL: Senator Keyes.

SENATOR KEYES: Yes.

SPEAKER MARVEL: We are on the Nichol amendment.

SENATOR KEYES: The Nichol amendment and that has something to do with the needles evidently. Senator Chambers, if you ever stuck yourself once with a vaccination needle for a hog you are carrying which I have, they are pretty good size. They are a little bit smaller than a sixpenny and bigger than a needle but the thing that worries me is in this bill is it possible, you can come into my house anytime in a three month period and you can find all the way from one up to two hundred needles. You can go down to my grandson and
