revenues in mind. It is possible that there would be fees that are high enough to generate revenues. That would probably be the type of revenue that we would be talking about, charges to the water users. Those charges would go back in to pay for the revenue bonds. Conceivably at some point in time there could be charges for groundwater recharge for people who are not directly using the water but who are indirectly benefiting from the water, and those revenues could go back into the payment of the principal interest of the bonds.
