SPEAKER NICHOL: The committee amendments are adopted.
Anything else on the bill?

CLERK: Nothing further.

SPEAKER NICHOL: Senator Wesely, do you wish to explain the
bill further?

SENATOR WESELY: Thank you.   I will defer to Harold in a
minute.   I would like to explain LB 313.   Again, we are
really dealing with some federal language changes that have
occurred dealing with mobile homes and manufactured homes
and modular homes.   Evidently the federal government has
some standards across the country and they decided that
manufactured home wasn't what they were going to call them
any more. They are going to call them modular housing
units.   Isn't that right?   Oh, okay, that's right.   They
decided that mobile home...now if I am confused, wait till
we get done discussing this, you will all be confused.   They
decided that mobile home didn't sound so hot and so the
mobile home people went to the federal government and said,
let's come up with something better, let's call them
manufactured   homes   or   manufactured   housing   units.
Manufactured housing units.   But we already had manufactured
housing units in the statute, so last year we had to change
what were called manufactured housing units to modular
housing units. So we did that last year. Senator Barrett
will enjoy this, he was around last year when we did it.   So
now we don't have manufactured housing units, we have
modular housing units.   But now that we have done that, we
have opened up that manufactured housing unit and now we can
move the mobile homes into becoming the manufactured housing
unit.   So that is what we have done.   We have taken one step
last year.   This is the second step and if we don't pass
this, people that manufacture mobile homes, now manufactured
housing units, will not be able to sell those outside the
state.   This is an important bill for those who manufacture
these   manufactured   housing   units   and   shouldn't   be
controversial. Senator Sieck.

SPEAKER NICHOL: Senator Sieck.

SENATOR SIECK: Senator Wesely, I don't think it is too
controversial, but I did have a couple of questions to ask
you. What you are actually doing with this bill is to get
