

motion that would have made the bill take effect as she's caring about the babies and wants to see that the enforcement takes place as soon as possible. That is not what this bill is here for today. They had to rush it out of committee to keep those masters people with their jobs. Senator Hoagland told me that there was a chance, if this bill wasn't passed, because he admitted that it didn't have to be passed this year, he said those people may go out of business. Now if I'm not telling the truth, he will have a chance when he speaks on the committee amendment itself to tell you. If he says that is not the reason for passing it right now, then there is no reason whatsoever, there is no reason whatsoever. But the proof that that is what he wants, the only provisions of the bill that will take effect on time, as any other bill, are those that deal with those master programs.

SPEAKER NICHOL: One minute.

SENATOR CHAMBERS: Those are the only portions that take effect. Not a more certain way to collect money for the babies because even if you get this bill in place, that is not going to happen anyway. If judges are thumbing their noses now, they will thumb their noses then. You'll just have more laws that are not being complied with. So then you will come back with another bill. You'll pass almost identical language and you'll put at the end of it, and this time, by God, we mean it, and underline it twice and give that to the judges. Then they'll just laugh twice as hard. That is what is going to happen. But, Senator Higgins, I admire your attempt to use psychology on me, but it won't work.

SPEAKER NICHOL: Time. Question is the adoption of the Chambers amendment to the committee amendments. All those in favor vote aye, opposed nay. Have you all voted? Senator Chambers.

SENATOR CHAMBERS: How many are excused?

SPEAKER NICHOL: Sixteen.

SENATOR CHAMBERS: It's only 36, we still have 13 people. The chairman can...chairman won't make any difference. It just takes a simple majority on an amendment to an amendment?
