

If those items that are of such historical note that are housed in Morrill Hall are to be preserved, this is a cost that will need to be done at that point in time that we have the funds. But if the planning...the pre-engineering is completed prior to or now, then we will have that out of the way and funding can be provided as soon as it is possible.

SPEAKER NICHOL: Senator Beutler, please, then Senator Lynch.

SENATOR BEUTLER: Senator Haberman, Senator Haberman, Morrill Hall is all about western Nebraska. Morrill Hall is western Nebraska. Morrill Hall is filled with old bones, bones of elephants and bones of rhinoceroses and bones of big birds and of things in between, Senator Haberman. Really to get into Morrill Hall there are only two qualifications, you have to be a prehistoric monster, Senator Haberman, and you have to be from western Nebraska. That is why I think you probably should take a kinder attitude towards Morrill Hall because, Senator Haberman, your very own bones would probably qualify some day.

SPEAKER NICHOL: Senator Lynch then Senator Remmers.

SENATOR LYNCH: Mr. President, members, I don't think Senator Haberman heard you, Senator Beutler. It looked like he was marrying Wesely who looks like he is about to get married to Senator Nelson. But in any case, seriously, I would have to oppose Senator Haberman's amendment. It makes little sense to me to not prepare for the future. Even though this year we are not quite sure what circumstance we will be in financially next year, those of us who have had a chance to visit Morrill Hall and recognize the great significance it has not only...the clothes don't make the man, I hope, Senator Barrett. (laughter) Might look like I'm golfing, but I'm really politicking right now. But in any case, in any case there is a great significance attached to Morrill Hall, not just for Nebraskans but for everyone. I think it is important for us to be in a position, when and if we should next year, to be able to fund that air conditioning system that we should do it. It would, in fact, be almost scandalous that, should next year we be able to find the funds to provide that condition air system for that good service, and facility and building, that we would not be in a position to do it simply because we failed to spend \$65,000 to be able to plan towards that. It seems
