

March 14, 1986

going to arbitrarily raise the number to 22. He and I have talked about it since then. Senator Vickers made it clear. That was why I said next time we should put the number up on the board. And I thought everybody was following what I was saying, but apparently they didn't so I am trying to make it clear now. And if I caused the Speaker any undue agony because I misunderstood what he was doing, I felt a little discomfort because the Speaker wasn't sure just what I was doing and I felt the need to say that. And although it is not appropriate to make a statement and then make a motion, I move that we adjourn.

SPEAKER NICHOL: I'm used to the discomfort, Senator Chambers. Okay, if I may just state, Senator Chambers, we will take your motion to adjourn. Monday, we start at nine, of course, and we are starting with Final Reading. You should know that in case you would like to be here for Final Reading. And, of course, other interesting things happen during the week. I do want to say that I appreciate your difficult work during this week. And probably a situation be coming out of the 300 Committee and if we discuss this year, that will take considerable time. But in a reasonable shape, I think, so far and I do appreciate your difficult work the last couple of weeks. With that, you have a motion in front of you to adjourn until nine o'clock, Monday. All those in favor say aye. Opposed nay. We are adjourned.
