

yesterday and it didn't come up yesterday but on your desk you should have received a summary about the amendment and also a letter from Greg Wright who wrote to you previously about this. This is in the Health Department and they have a great need for an additional attorney. Those of us who work on the Health and Human Services Committee have been well aware of problems in the Health Department in trying to get different rules and regulations adopted. We feel that this would be very advantageous to have this additional attorney but we know the money is tight so we are not asking for the additional \$30,000 in the budget, we are just allowing them an additional flexibility within their budget if they wish to hire that attorney that they feel is desirable. This is not an increase in their budget. This is no tax increase, no budget increase but it does give them the flexibility to hire that additional attorney that they feel is absolutely essential to carrying out their responsibilities. So because of that I don't see why there would be a problem in adopting this. I would ask your support for the amendment.
