LB 603

to be brow beaten. That is what is going to occur. My vote is not going to change. They target individuals in this body because they know that by one means or another they can bring pressure to bear and cause them to change. So if you adopt this amendment, whatever it is, you have given them what they want which is to delay the bill and that is all that is really wanted. I am opposed to the adoption of the amendment, but for the record I would like to ask Senator DeCamp a question.

SENATOR CARSTEN: Senator DeCamp, will you respond to a question, please.

SENATOR DECAMP: Yes.

SENATOR CHAMBERS: Shepherd John, what does the amendment do at most?

SENATOR DECAMP: Baaa baaa.

SENATOR CHAMBERS: That is sufficient, thank you.

SENATOR DECAMP: No, no, I will answer. The amendment does exactly what I read. For example, there is no authority to purge files. That is pretty important that you be able to purge your obsolete files.

SENATOR CHAMBERS: But it doesn't have to be done this session, does it? Between you and me, just you and I conversing here as men of the world.

SENATOR DECAMP: Of course, between you and I and nobody listening, right?

SENATOR CHAMBERS: Right.

SENATOR DECAMP: Nobody can overhear us.

SENATOR CHAMBERS: No.

SENATOR DECAMP: You ain't going to rat on me?

SENATOR CHAMBERS: They are not paying attention, go ahead. No, it's not important, go ahead. It's insignificant. We don't have to do it.

SENATOR DECAMP: It's a good amendment, probably should be done.
