

completely out of step and out of touch with other people's kind of reality, but we don't all walk to the same drummer and what I hear inside of me causes me to do what I am doing today and what others hear inside of themselves will cause them to do what they are going to do. But I can see this Legislature being held up to ridicule, scorn and mockery for passing this provision thanking this individual when nobody can cite a single thing he did for the State of Nebraska or the people of Nebraska that separates him so much from the rest of the population as to warrant a resolution thanking him. So I am suggesting that we remove this proposition. Maybe somebody at HNC Internorth is going to say, the Legislature thought that Sam Segnar should have kept his position and they are giving a message to the current hierarchy and officials by expressing through this resolution disapproval of how this struggle came out. They don't like the fact that Willis Strauss and Lay are now in charge.

SENATOR CARSTEN: One minute.

SENATOR CHAMBERS: They wanted Segnar to stay there. And since Segnar is not there, the Legislature knowing these things because Chambers told them decided that they are going to vote and say as an official legislative action that those of you who rejected this man and replaced him with another dissatisfied the Legislature. So those are issues I think you ought to consider when you vote on this proposition. And with that, I am asking that you strike that entire second resolve.

SENATOR CARSTEN: Senator Higgins, for what purpose do you rise?

SENATOR HIGGINS: Mr. President, I would just like a point of clarification. If we strike this segment of the resolution, what will be left?

SENATOR CARSTEN: Senator Wesely, would you like...Senator Chambers, perhaps. Would you care to answer the question, Senator Chambers?

SENATOR CHAMBERS: Senator Higgins, I'm not through with my amendments yet so I honestly can't say what would be left but currently the only thing excised out was the word "Inexpensive" in the first "Whereas".
