

possible to carry this resolution with that body as they go out to the funeral of Senator Marvel. I would so request that be done. Thank you.

SPEAKER NICHOL: I thank you. Senator Warner, please.

SENATOR WARNER: Mr. President, members of the Legislature, I think I remember Dick best as a very gentle man. You know he was relatively quiet. He always had time for everyone or anyone who wished to visit with him, and while we all recognize his contributions to the institution of the Legislature as well as to state government, I would repeat that what I really recall so frequently seeing him do is to take the time to sit and visit particularly with young people. And I noticed in one of the stories that was written in the press on his passing it quoted his own remarks indicating the desirability he had to encourage people to become involved and concerned with government and he emphasized that at every opportunity not only as a teacher, but in his personal contact and I can recall legislation he introduced as well that were along those lines. So he truly is an individual that as has been said, we all miss, have missed and we certainly, Betty and I, extend our very genuine sympathy to Mrs. Marvel and the two children and the whole host of friends that we all know that Dick had.

SENATOR CARSTEN PRESIDING

SENATOR CARSTEN: Thank you, Senator Warner. Senator Nichol, please.

SPEAKER NICHOL: Mr. President, members of the Legislature, when I came to this Legislature I wasn't very well welcomed at the time because of a problem in the election immediately before my coming here, but the thing I remember about Senator Marvel was he was kind to me and treated me like I might eventually be welcomed anyway and I really appreciated that inasmuch as he was a kindly man. I think the thing that most of us would be remembering about him was that his genuine sincerity in doing what he thought and voting the way he thought was best for all of Nebraska. And of course, when the disease started to hit him and knock him down, it pained us greatly at that time perhaps more than at this time, so with that being said, it was a pleasure for all of us that knew him to have known him. Thank you.

SENATOR CARSTEN: Thank you, Senator Nichol. Senator Higgins,
