

they meet certain qualifications that, clearly, I think are unconstitutional. On that, Senator Kristensen, we do agree, in a couple different areas, not the least of which is special legislation. Do they, I think, run afoul of the Constitution, but that's not the issue here either. The issue here is simply this. It's that this amendment says if you agree with the issue of having all personal property tax go back on the rolls January 1 of 1992, and even if you don't, you should at least put this proposal in proper form. It should be in the form so that you know what you're dealing with, that you aren't compounding the problem of special classifications for personal property tax even farther because, by leaving this in, by not voting yes on this amendment, that's exactly what you do. You narrow the class even farther, you make the sore thumb stick out even more. I would urge adoption of the amendment. It's pretty clear from the discussion that the smoke and the smog got pretty thick in here. Many people I think still don't know just what exactly this is. It is not an attack on 775. It says that we're going to deal with all personal property tax in the same form and fashion when we address this overall issue when other amendments come up. It is important that this be adopted so that they're all being dealt with equally. I would urge adoption of the amendment. Mr. Speaker, I would ask for a call of the house so that we can get all the members here.
