I have an amendment on that. I want you to understand that these particular amendments that have been adopted onto this bill really don't have anything to do with the technical problems that are being raised by Senator Kristensen. They don't have anything to do with it. And, if their only concern in passing LB 262 is for...to deal with these technical changes that they would like to deal with involving assumption of the risk or when does LB 88 actually go into effect, we can deal with those in the earlier section.
