

meant towards you intended, but the only ones they allow to be queens are little, they call them the bubble gum set, very, very young girls, young enough to be the great-granddaughters of these old dried up geezers sitting up there and if you saw them on the street in that combination you'd think he is probably some kind of pervert. But because these are the upper class of Nebraska, these are the people of dignity, then it's all right. And for these people the Legislature is groveling, is about to embark upon what is very bad and unjustifiable policy. It will not be invoked with reference to any other entity or operation this session or any other session and we are supposed to say with a straight face that we're doing something that is a positive good for society.

PRESIDENT MOUL: One minute.

SENATOR CHAMBERS: I don't buy it. But again, they can laugh at the Douglas County Board. The elitists can laugh because the Legislature is showing once again why there is no respect for us. We don't understand anything. We talk about economic issues as though we understand them. We talk about fair tax policy as though we understand it. We don't understand anything. What comes out of our mouth probably is the last directive we got from the special interest group for whom we will vote and that is why there is so much inconsistency. They don't allow more than one brain cell in a senator to operate at a time, cart us off in airplanes to go playing golf with us, then we vote the way they tell us to vote. That's what happens and I hope that this Hall amendment will go down to defeat.

PRESIDENT MOUL: Thank you, Senator Chambers. Senator Nelson.

SENATOR NELSON: Yes, I believe, and I could be wrong this. I think this makes about 50 or \$55,000 difference to Fonner Park, this amendment. My memory sometimes fails me but I don't believe it did and I think I supported it and I think that we need to support any business or any entity to do the best that we can in our state and I think since Senator Chambers kind of reminded me of this, didn't we have a bill of 1.3 or 1.8 billion for economic development to help industry in north Omaha and I think we all supported that and I have no problem with that. Anytime that we can bring jobs or industry to help our state and I kind of look at this as the same thing and I think maybe that Senator Chambers can help me out, but I believe two or three years ago we did have a bill that directed economic development
