

Occupational Board Reform Act Survey
Nebraska Accountability and Disclosure Commission
October 3, 2025

Provide an explanation of why you believe or do not believe that the occupational regulations overseen by your board have been effective.

Agency Response: The rationale behind the registration law is that members of the Legislature and members of the public should know the identity of those attempting to affect the Legislature, who they are representing and how much money is being spent in the process. Every year this information is available on the Nebraska Legislature website.
