Introduction

The 2025 edition of Nebraska At-A-Glance comprises 119 topics, ranking states across various categories, including demographics, agriculture, education, and taxes. Nebraska At-A-Glance is designed to provide policymakers and the public with a view into essential state-level data comparisons. The data presented excludes Washington D.C., Puerto Rico, and U.S. Territories.

Nebraska At-A-Glance can be used as a quick reference or a starting point for research into policy areas vital to the Cornhusker State. This document only offers a sample of the vast amount of available data on various policy topics. Senators and their staff members are welcome to contact the Legislative Research Office for any policy research requests. The information presented in this report reflects the most current data available for all 50 states. For some topics, per capita or percentage figures were utilized to account for population differences between states.

State values are always ranked from greatest to least, regardless of subject matter. Thus, a greater ranking is not always preferable to a lesser ranking. Values are displayed only to a certain decimal place, so states may appear to have the same value, but a different ranking because their actual values differ. U.S. averages represent an average of the 50 states.

Each ranking page features an icon indicating whether Nebraska's rank among states increased, decreased, or remained the same compared to the <u>2021 edition</u> of Nebraska At-A-Glance or to previously published data. Additionally, supplemental information about each subject, including data definitions and analysis is provided on each page. Ranking pages also include a chart comparing Nebraska to the national average (or historical Nebraska data) and a map illustrating how states rank in comparison to each other.

Data was accessed and collected during the 109th Nebraska Legislature, 1st Regular Session. Source information is located at the bottom of each topic page. Due to extensive definitions, a data glossary is available in digital format by accessing Nebraska At-A-Glance Online.

Following the 2020 Census, the Census Bureau redefined urban areas as an area that encompasses at least 5,000 people or at least 2,000 housing units. This is a change from the previous minimum of 2,500 people which had been in place since the 1910 Census.

After the 2010 Decennial Census, the urban population in Nebraska ranked 28th among states (73.1%). Nebraska's rank increased to 25th in 2020 but the share of its population in urban areas (73.0%) decreased slightly.

Land in farms primarily consists of agricultural land used for crops, pasture, or grazing. It also includes woodland and wasteland not actually under cultivation or used for pasture or grazing, provided it was part of the farm operator's total operation. Land in farms includes land owned and operated as well as land rented from others.

Acreage per farm in Nebraska increased from 2023 (991) to 2024 (993) and the state remained ranked 8th.

Persons are classified as unemployed if they do not have a job, have actively looked for work in the prior 4 weeks, and are currently available for work. Persons who were not working and were waiting to be recalled to a job from which they had been temporarily laid off are also included as unemployed.

The annual average unemployment rate in Nebraska increased from 2023 (2.3%), when ranked 45th among states, to 2024 (2.8%). Unemployment rates undergo benchmark revisions every year for at least the most recent two years of data.

A household consists of all the persons who occupy a house, an apartment, or other group of rooms, or a room, which constitutes a housing unit. The count of households excludes persons living in group quarters, such as military barracks and institutions. Inmates of institutions (mental hospitals, rest homes, correctional institutions, etc.) are not included in the survey.

In 2018, Nebraska's average household income (\$77,278) ranked 28th among states. Nebraska ranked 27th among states in 2023 (\$100,194).

IN COMPARISON TO PREVIOUS

Some states define capacity differently from the Bureau of Justice Statistics. Overcrowding was not calculated for three states in 2022: CT, MO, and OH.

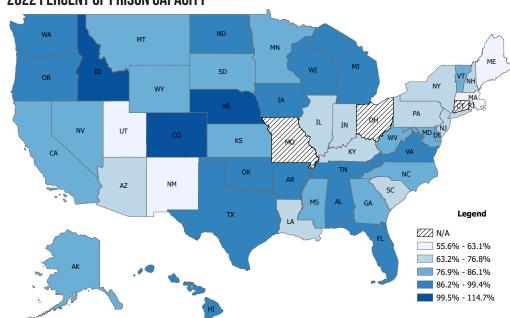

In Nebraska, the prison custody population as a percent of the highest capacity measure (whether design, operational, or rated capacity) decreased from 2021 (121.0%) to 2022 (114.7%). Despite the decrease, Nebraska remained ranked 1st in prison overcrowding among 47 states.

Parole refers to criminal offenders who are conditionally released from prison to serve the remaining portion of their sentence in the community. Maine no longer has a parole program and was removed from the Annual Parole Survey in 2022.

Nebraska's rank remained 43rd among 49 states after its parolee population increased slightly from 2021 (935) to 2022 (940).

Probation refers to adult offenders whom courts place on supervision in the community through a probation agency, generally in lieu of incarceration. All of Maine's community supervision is accounted for in the probation population.

In 2021, Nebraska's probation population (11,756) ranked 37th among states.

The percentage of 3- and 4-year-old children enrolled in state-funded preschool (2023-2024) in Nebraska was the same as the previous school year (25%), but the state's ranking fell from 15th to 17th. Several states do not have such a program, and Indiana requires that parents be employed or enrolled in school to be eligible.

People identified by the ACS as having a disability report difficulty with specific functions, and in the absence of accommodation, may have a disability. This definition is different from the one described by the IOM conceptual framework, but it relates to the programmatic definitions used in most Federal and state legislation.

The population with a disability in Nebraska increased from 2018 (11.5%) to 2023 (12.1%), but the state's rank remained the same.

IN COMPARISON TO PREVIOUS RANK

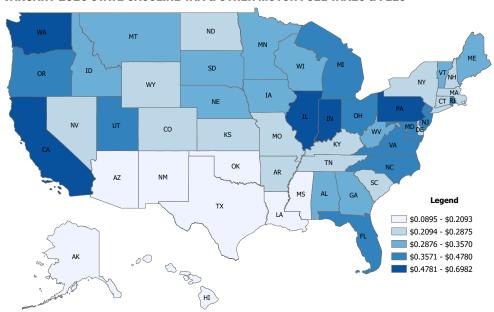

The total federal gasoline tax was \$0.1840 per gallon in January 2025. Other taxes and fees may include sales and/or use taxes, inspection fees, environmental fees, or other charges. State taxes do not include county and local taxes.

Due to an \$0.013 increase per gallon in the state gas tax, the gas tax and other taxes and fees in Nebraska increased from 2024 (\$0.3) to 2025 (\$0.313). The state increased in rank among states from 26th to 24th.

Data primarily includes the Temporary Assistance for Needy Families (TANF) program and other cash assistance programs. The data mainly includes information on cash assistance benefit levels within the programs and in most cases it does not reflect total TANF spending. The "other cash assistance" category includes optional state programs like Supplemental Security Income (SSI) and General Assistance (GA), which are not funded in all states.

Data reflects the state costs to build and operate prison systems. Some states include juvenile institutions, aid to local governments for jails, drug abuse rehabilitation centers, and alternatives to incarceration such as probation and parole. Corrections spending is more heavily reliant on general funds than any other spending category.

Nebraska's rank among states fell from 4th in fiscal year 2022 (3.0%) to 5th in 2023 (3.3%).

Data reflects state spending on medicaid as a percentage of all state expenditures. In addition to general funds, states use a combination of revenue sources including insurance premium taxes cigarette taxes, pharmaceutical rebates, intergovernmental transfers, provider assessments, and local funds to provide the state match.

Nebraska's rank among states increased from 39th in fiscal year 2022 (21.4%) to 33rd in fiscal year 2023 (23.3%).
