Research Report 2018-4

This edition of our annual "At-a-Glance" series ranks Nebraska's 93 counties in a variety of metrics – from economics to education to taxes. It is a statistical snapshot of Nebraska, designed to give policymakers and the public a glimpse of the challenges and opportunities facing the state.

The tables, graphs, and maps in Counties At-a-Glance use the most current data available for all 93 counties. Much of the information comes from the U.S. Census Bureau's American Community Survey (ACS), an ongoing survey that collects much more detailed information than the decennial census can provide. Sent to approximately 3.5 million addresses every year, it is the largest household survey that the U.S. Census Bureau administers. Counties At-a-Glance uses ACS five-year averages in order to minimize outliers and reduce the margin of error of each measure. More detailed methodology and margin of error information can be found at the U.S. Census Bureau website.

Nebraska counties vary widely in population, so per capita or percentage figures are often used to account for these differences. Counties are always ranked from highest to lowest value, without regard to subject matter, so a higher ranking is not always preferable to a lower ranking. Counties may occasionally appear to have the same metric values, but different rankings. This is because values are displayed only to one or two decimal places. Thus, two counties may appear to be tied, when in reality, their actual values differ slightly. Every ranking also includes a choropleth map, and a bar graph comparing the highest and lowest ranked counties. Source information is located at the bottom of each page.

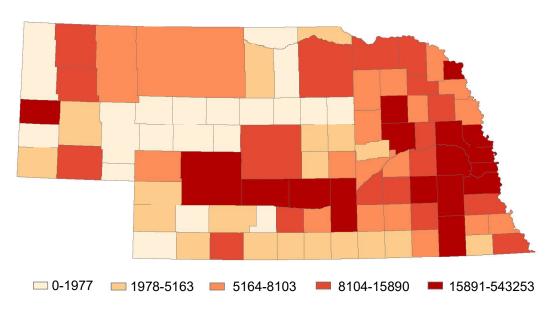

It is our goal to make this report as useful as possible. To that end, policymakers, staffers, and the public are encouraged to provide feedback on how this report can be improved in the future.

MEDIAN AGE

Median age is the age that divides a population into two numerically equal groups — that is, half the people in the county are younger than the median age and half are older.

MINORITY POPULATION

Race data in the census is based on self-identification. Respondents choose the race (or races) with which they most closely identify. This ranking combines all respondents who identify as Black or African American, American Indian or Alaska Native, Asian, and Native Hawaiian or Other Pacific Islander. People who identify their origin as Hispanic, Latino, or Spanish may be of any race.

NONCITIZENS

The U. S. Census relies on the Department of Homeland Security Office of Immigration Statistics to estimate noncitizen populations. This data is based on administrative data, such as the number of persons obtaining legal permanent resident status, refugees and asylees, naturalizations, nonimmigrant admissions, and enforcement actions.

SINGLE PARENT HOUSEHOLDS

Single-parent households include children under age 18 who live with their own single parent either in a family or subfamily. Single-parent families may include cohabiting couples and do not include children living with married stepparents.

INCOME

Median household income is the midpoint of all incomes in a county — half of households made more than the median, and half made less. A household consists of all the people who occupy a single housing unit. This ranking is based on the five-year estimate of inflation-adjusted income for the years 2012 through 2016.

HOME OWNERSHIP

A housing unit is a house, an apartment, a mobile home, a group of rooms, or a single room intended for occupancy. A housing unit is owner-occupied if the owner lives in the unit, even if it is mortgaged or not fully paid for. This ranking is based on a five-year average of homeownership from 2011-2016.

HOUSING PROBLEMS

This rankings is based on U.S. Department of Housing and Urban Development "CHAS" data (Comprehensive Housing Affordability Strategy) designed to understand the housing needs of low income households. This ranking is based on the percentage of households with at least 1 of 4 housing problems: overcrowding, high housing costs, or lack of kitchen or plumbing facilities.

VACANT HOUSING

A housing unit is vacant if no one is living in it at the time of the survey, unless its occupants are only temporarily absent. In addition, a vacant unit may be one which is occupied by persons who have a usual residence elsewhere. New units not yet occupied are classified as vacant if construction has reached a point where all floors, exterior windows, and doors are installed.

OBESITY

Obesity is defined as people with a Body Mass Index (BMI) of 30.0 or more, regardless of sex. BMI is a ratio of height to weight, calculated by dividing weight in pounds (lbs) by height in inches (in), squared, and multiplying by a conversion factor of 703. As an example, a person 5' 8" and weighing 197 pounds has a BMI of 30.

DISABILITY

The ACS asks people about six disability types: hearing difficulty, vision difficulty, cognitive difficulty, ambulatory difficulty, self-care difficulty, and independent living difficulty. Respondents who report experiencing any one of the six disability types during the past year are considered to have a disability.

MENTAL HEALTH PROVIDERS

Mental health providers are identified via the National Provider Identifier, a unique 10-digit identification number issued to health care providers in the United States by the Centers for Medicare and Medicaid Services.

MENTAL HEALTH PROVIDERS PER 1,000 RESIDENTS

MENTAL HEALTH PROVIDERS PER 1,000 RESIDENTS

Mental Health Providers per 1,000 Residents

ARREST RATE

For this ranking, an arrest is counted each time a person is taken into custody or issued a citation. While an individual may be charged with multiple crimes at the time of arrest, only one arrest is counted. This rate includes all arrests made in the county, including arrests of individuals who do not live in the county.

TOTAL ARRESTS PER 1,000 RESIDENTS

JUVENILE ARRESTS

In addition to typical arrests, in the case of a juvenile (defined as under the age of 18) an arrest is also counted when they are issued a warning and released without further action. While law enforcement agencies in Nebraska are required to submit monthly reports, not every agency does. Therefore, gaps in the data may exist due to jurisdictions failing to report.

ARRESTS PER 1,000 UNDER 18 POPULATION

ARRESTS PER 1,000 UNDER 18 POPULATION
