SPEAKER MARVEL: May I have the attention of the members of the Legislature for just a second. I think the last few days have been tough on all of us. I think we are all

and contributing member of society. Now I know that we all feel that way but I want to point out that when this becomes law this will be subject to court action and my brother-in-law happens to be Superintendent of Schools in Pequannock, New Jersey where they have established a thorough and efficient form of schools in the State of New Jersey. My brother-in-law has said that the last seven years since they established that has been pure chaos and more expensive paperwork because you see when you have to prove that you have a thorough and efficient system of schools, that means that you have to write down and you have to produce documentation and you have to go before certain groups and committees and departments to prove, not just what you are doing or how many class hours or what subject matter, but that you have been doing it thoroughly and you have been doing it efficiently and this is a very subjective opinion particularly when what I think is the opportunity to develop the values, attitudes, skills, and knowledge necessary to become a happy, self-confident, responsible, productive, and contributing member of society may not be what my school board agrees with and it will open the way for more court cases also. If you talk about fiscal impact, it is going to be twofold. It is going to be on the blizzard of paperwork which is required of school districts and it will be on our courts as these cases come to our courts and impact on them. Believe me, there is going to be a great fiscal impact. Thank you.

SENATOR CLARK: I think what we are going to do right now is break for lunch. There is no way to finish this thing right now. The Clerk will have to read a few things in first.
